### NBA Criterion 8: Infrastructure

Sub Criteria	Marks	Evaluation Guidelines
<b>8.1 Classrooms &amp; Learning Facilities</b>	10	A. Adequate well equipped classrooms to meet the course needs (4) B. Availability of IT learning facilities, utilization, initiatives to ensure students learning (3)
<i>Exhibits Context to be Observed/Assessed</i> Adequacy well equipped classrooms, utilization		
<b>8.2 Library</b>	10	A. Availability of relevant learning resources including e-resources and Digital Library (7) B. Accessibility to students (3)
<i>Exhibits Context to be Observed/Assessed</i> Availability		
<b>8.3 IT Infrastructure</b>	10	Availability of computer hardware with internet access and services required for the institute, operation and management of its institutions (10)
<i>Exhibits Context to be Observed/Assessed</i>		
<b>8.4 Learning Management System</b>	10	Use of suitable applications for the entire campus for administration, teaching, learning and delivery of educational technology (also called a learning) courses or training programs (10)
<i>Exhibits Context to be Observed/Assessed</i>		

4

### NBA Criterion 2: 2.1.3.2 Transparency

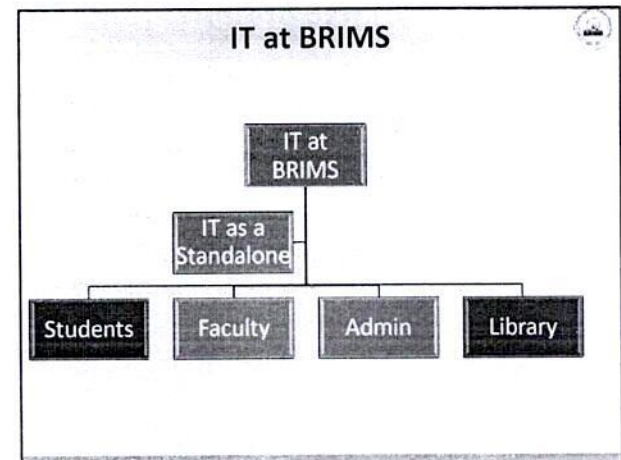

2.1.3.2 Transparency	7	A. Information on the policies, rules, processes is to be made available on web site (2) B. Dissemination of the information about student, faculty and staff (5)
----------------------	---	--

**Management Simulation Facility for Practical Learning using Learnbiz**

Learnbiz Marketing Simulation activity for PGDM and MMS 2nd year marketing students

DR. V.N. BRIMS Academic Deliverable Cell - [vpmthane.org](mailto:vpmthane.org)

Dear MMS & PGDM MARKETING Students,

Learnbiz Marketing Simulation activity for PGDM and MMS 2nd year Marketing students

Following is the schedule:

- 9:30 am - 12:30 pm on Friday, 22nd Feb 2024, Simulation Practice session in IT Lab
- 4:30 am to 12:30 pm on Friday, 1st March 2024, Final Tournament in IT Lab

- Certificates will be awarded to winning teams.
- Simulation practice and tournament participation will be considered for internal assessment purpose.

Please note that attendance is compulsory.

16

17

**PRISM – Brain Mapping Tool**

**PRISM** The PRISM Personal Perception Inventory

Inventory Input Complete

Thank you for taking the time to complete this Inventory. The Practitioner who sent the Inventory to you should be in touch soon to discuss the feedback regarding the PRISM system.

If you have any queries about the PRISM Personal Performance Mapping System, please contact either the Practitioner who sent you this Inventory or PRISM Administration by using the Contact Form.

Thank you

IT Infrastructure		Criteria 8.3	15 Marks
IT Infrastructure documents – Hardware, softwares, network resources, services, processes			
No. of PCs = 146	No. of Laptops = 34	No. of LCD Projectors = 14	No. of CCTV Cameras = 56
No. of Printers = 14	No. of Scanners = 3	Wireless Routers in premises = 9	50 Mbps 1:1 Lease Line

42

43

### IT Infrastructure

- UPS Facility in IT Lab
- Internet connectivity is through a 50 mbps link by Intech
- Firewall Security - Fotigate 200E
- Seqrite Endpoint Security
- IT Instruments Repairing & Maintenance
- E-Waste - Certificate of Responsible Recycling

44

### Software's List

Name and it's use	Year of Purchase
Teach Us App to automate the internal processes such as attendance recording, inbuilt notifications, feedback on professor's performance, syllabus updation, keeping notes handy all the time, notice circulation	2021
Centralised Database to share the common data	2021
Doodly software which allows anyone, regardless of tech or design skills to create doodle videos	2021
Microsoft Teams for conducting Online lectures.	2020
Office to conduct Online Proctored Exams	2020
Turnitin for Plagiarism	2018
TickertPlant Software for Data Analytics, Forex & FI & MM	2018
Learnbiz Simulation - 2 Modules for Finance, 2 Modules for Marketing, 1 for Module Operations	2018
Smart Card Students Attendance	2018
MS OFFICE 2016 in 15 Laptops	2018
Online Databases like CRISIL, J-Gate, ProQuest, EBSCO	2014
Entry Door Access Device in Library & IT Lab	2014
Customised Software - Khushi Software for Exam Department	2014
SPSS Software (Statistical Package for social Sciences)	2010
In-house Accounting Package FA used for accounts, payroll	2006

45

46

### Risk Identification and Action Plan

Sr. No	Risk Identified	Type of Risk	Probability	Severity	Risk Index	Action
1	Virus Attacks	Technology	4	4	16	Updated anti-virus scanner is installed in server. Regular monitoring done by server engineers. New Firewalls
2	System/Server failure	Technology	2	5	10	Regular backup at the user end and server engineers end
3	Software Updation	Technology	4	3	12	Time to time as need arises. software updation done by IT staff

47

### Risk Identification and Action Plan

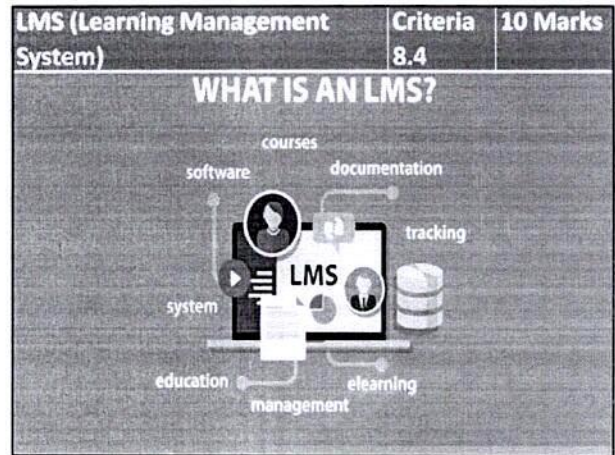

4	Hardware Maintenance takes time	Technology	3	3	9	Alternate vendor should be arranged
5	Slow & Secured Network Connection	Technology	3	2	6	Social networking sites are blocked. Network connection is protected and access is allowed only for registered IP addresses
6	Shortage/ Damage of Devices like Speakers, Mikes, Projectors, Computer Peripherals like RAM, Hrad Disk, Processor, Motherboard, etc	Technology	2	3	6	Keep Buffer Stock

48

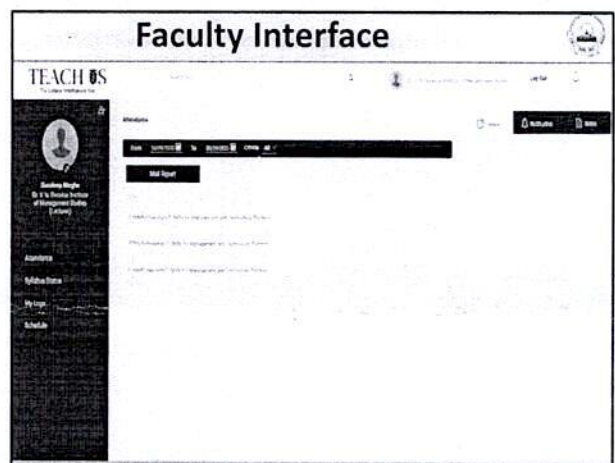

49

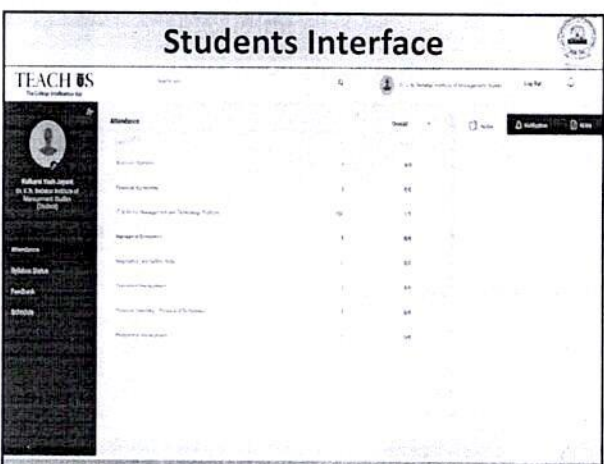

50

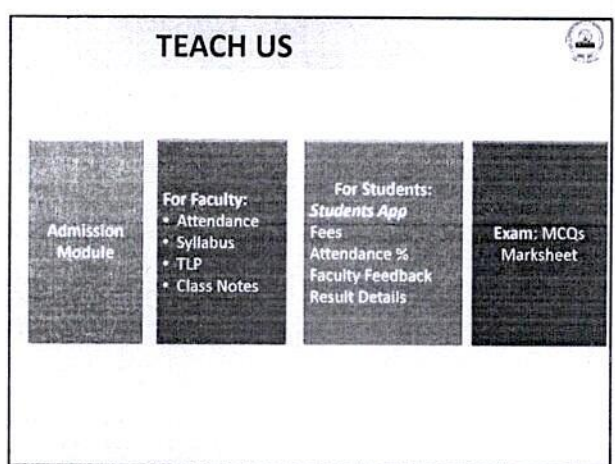

51

52

53

54

### IT Requisition Process

IT Assistant will prepare and give the requisition to IT Head

↓

IT Head will check and forward it to Admin Officer and then to the Director for their Approval

↓

After Approval, the order will be place with the vendor

55

### Reducing the Carbon Footprints

- Centralized Database
- E-Certificates to Participants
- Approvals through e-mails

56

### Cost Saving

50.02% Cost Saving in 2020-21 in papers for printing and xeroxing purpose.

57

### Webinars conducted by BRIMS

70 Webinars are conducted so far by BRIMS since April, 2020 till 31<sup>st</sup> May, 2021:

<https://vnbrims.org/Post-Graduation/brims-updates-3-seminar-and-workshops.html>

58

70

### ONLINE DIGITAL LIBRARY MEMBERSHIP

1. American Library
2. British Council Digital Library
3. National Digital Library of India

71

### 4.2 LIBRARY AS A LEARNING RESOURCE

4.2.1 Library is automated using Integrated Library Management System (ILMS)

DR V N BRIMS Library is proud to have a rich collection of Books, Bound volumes, Journals and Periodicals, Newspapers spanning all aspects of management studies

We have also subscribed to 3 on line databases on management studies . Databases search services like EBSCO Collection, Jgate and CRISIL are the other facilities that the library provides. The library is equipped with 10 PCs with Internet access for better connectivity and several network outlets to enable the use of laptops.

Library has well designed Library Repository/ digital library collection using the Dspace software like Online e-Resources, Online Journals, Online Institutional Library Membership, Open Sources Databases, eBooks, Faculty video lectures, NPTEL videos, syllabus, students videos, study materials, Question Papers, Project Reports, TLP etc.

The Institutes library automation is initiated in 2005 using the "Libsuite" software. Institute has recently installed library software named as "KOHA" which is helpful in keeping and maintaining records like Cataloging, Acquisition, Patrons, Serials, Circulation, Reports, Article Indexing, CD-Audio and Videos, Students Book Bank, Journals Bound Volumes, Kindles eBook Readers etc. The library is well stocked with wide range of books, journals and periodicals and automated with barcode system with KOHA software

**The version of the KOHA software is 18.05 and is being in use since 2011.**

72

**4.2.5 Availability of remote access to e-resources of Library**

4.2.5 Availability of remote access to e-resources of the library

DISCUSSION ON PEO STATEMENTS FOR MMS PROGRAM AT BRIMS

1

WHAT ARE PEOs?

PEO (Programme Educational Objectives) : PEOs are broad statements that describe the career and professional achievements that the program is preparing the graduates to achieve within the first few years after graduation.

(Source: NBA Accreditation Manual, 2019)

2

PROPOSED PEOs FOR MMS AT DR VN BRIMS

- PEO 1 – Management graduates will demonstrate competitiveness and create enough value in the business function and allied work.
- PEO 2 – Management graduates will demonstrate effective communication and problem-solving skills in professional environment while handling a diverse team.
- PEO 3 – Management graduates will take initiatives in their respective area of work and will use their learnings for societal development.
- Suggestions from faculty: <https://docs.google.com/document/d/1VJlRKE7Lj-m1tVUTcfrzEqp5k40GiuH8nBngDuBYcedit/edit#>

3

BRIMS MISSION STATEMENT

- To be ethical, sensitive and achieve excellence in management education through focus on research innovation and industry interaction.

4

### MAPPING OF PEOS WITH ELEMENTS OF MISSION STATEMENT

PEOs	MISSION	M1 - Excellence in management education	M2 - Excellence in management education	M3 - Research	M4 - Innovation	M5 - Industry interaction
<b>PEO 1:</b> Management graduates will demonstrate competitiveness and create enough value in the business function and allied work.		L	H	M	M	H
<b>PEO 2:</b> Management graduates will demonstrate effective communication and problem-solving skills in professional environment while handling a diverse team.		M	M	M	H	H
<b>PEO 3:</b> Management graduates will take initiatives in their respective area of work and will use their learnings for societal development.		H	M	L	M	H

5

### RATIONALE OF MAPPING

- PEO 1 - Demonstration of competitiveness and creating value in business function leads to fulfilment of mission element M2 - 'excellence in management education' and M5 - 'industry interaction' to a high extent while value creation can be achieved through M3 - Research and M4 - Innovation which maps moderately
- PEO 2 - Demonstration of effective communication and problem-solving skills may lead to innovative solutions, thus maps with M4 - innovation to a high extent and M3 - research to a moderate level while 'professional environment' maps high with M5 - industry interaction. PEO 3 element 'handling diverse teams' maps moderately with M1 - ethical and sensitive
- PEO 3 - Demonstration of 'taking initiatives in their respective areas of work' maps highly with M5 - industry interaction and use their learnings for societal development maps high with M1 - ethical and sensitive. By taking initiatives, they may achieve excellence through research and innovation so M2 and M4 maps moderately with PEO 3

6

**JOURNAL CLUB**  
On  
**Understanding Course Outcomes (CO) & Programme Outcomes (PO) Mapping**  
06<sup>th</sup> March 2021

Vibhuti Saxe  
Assistant Professor  
DR VN BRIMS

1

**Inquisitives from Journal Club on "Teaching Learning Process" on 1<sup>st</sup> February 2021**

- How to design Course Outcome Statements?
- How to measure Course Outcome attainment?
- How to Map Course Outcomes to Programme Outcomes?
- How to Justify relevance of CO → PO → PEO → Mission → Vision

*Learnings from last Journal Club*

2

**UNDERSTANDING CO - PO MAPPING**

Criteria No.	NBA Criterion	Marks
1	Quality of Programs and Courses Offered	100
2	Programme Outcomes and Achievement	100
3	Faculty Academic and Professional	100
4	Faculty Academic and Professional	100
5	Research, Academic and Professional	100
6	Infrastructure	75
7	Quality of Management and Administration	100
8	Financial Soundness	100
Total		700

\*Source: Evaluation Guidelines with administrative guidelines for the Display/Assessed - NBA PO Management

3

**COURSE OUTCOMES**

4

**What is Course Outcome (CO) ?**

- Course Outcomes are statements
  - That describe what students are expected to know
  - And are able to do at the end of each course
- These relate to the skills, knowledge and behavior that students acquire in their progress through the course
- The most important aspect of a CO is that it should be measurable.

\*Source: General Manual for Accreditation 2019-06, National Board of Accreditation (NBA) (Page 11)

5

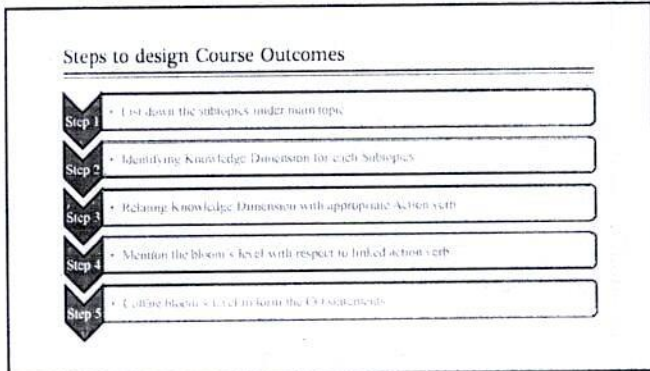

**How To Write Measurable Course Outcomes?**

- Writing an effective learning outcome that is measurable involves the structuring of two parts: a verb and an object.
- The verb phrase describes the intended cognitive process and the noun describes the knowledge students are expected to acquire or construct (Anderson & Krathwohl, 2001)

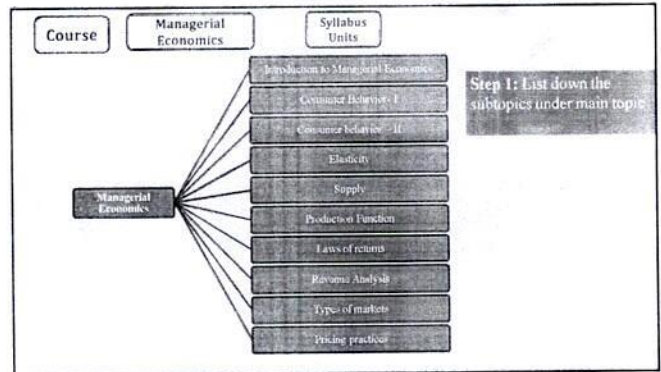

<b>VERB</b> Define, Identify, Apply, Analyze, Evaluate, and Create	+	<b>OBJECT</b> Knowledge, Factual, Conceptual, Procedural, Metacognitive
---	---	--

6

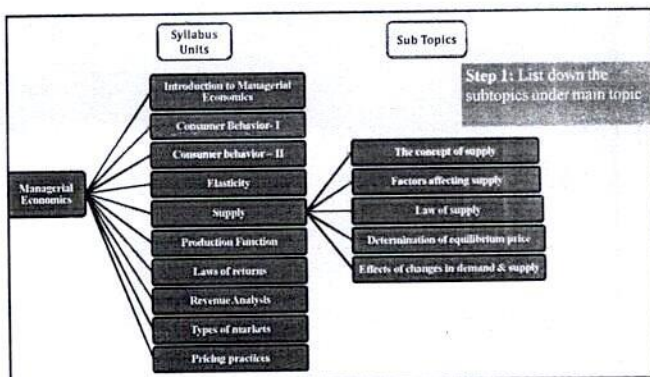

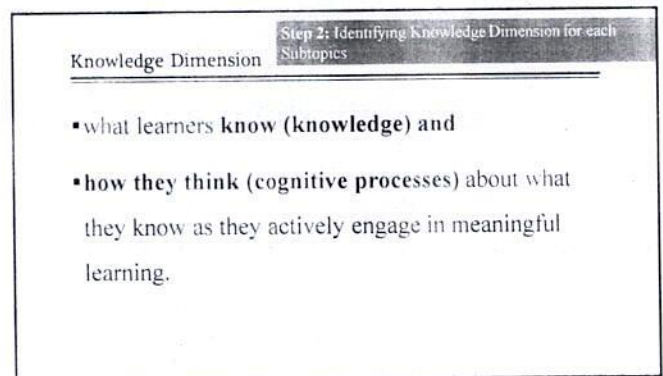

7

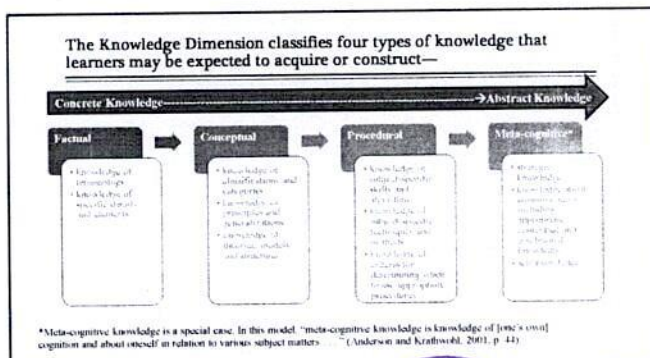

8

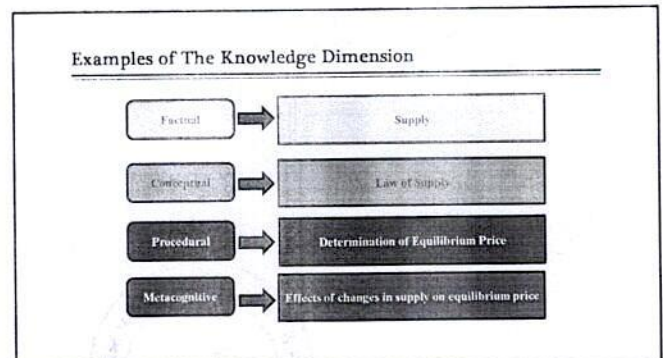

9

10

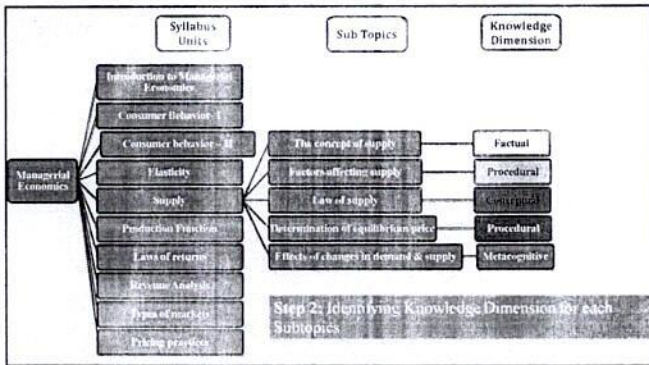

11

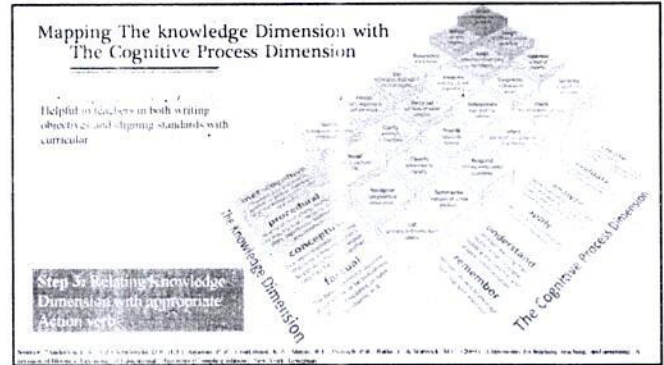

12

13

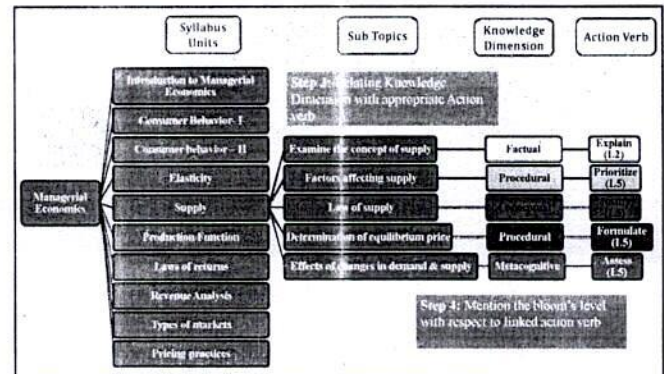

14

**Action Verbs**

Knowledge Dimension	Conceptual	Procedural	Factual
Explain	Describe	Identify	Recognize
Justify	Classify	Apply	Remember
Formulate	Compare	Use	Understand
Assess	Contrast	Execute	Know
...	...	...	...

**BLOOM'S TAXONOMY OF LEARNING OBJECTIVES (revised)**

15

16

How an objective (the student will learn to apply the reduce-reuse-recycle approach in conservation) is classified in the taxonomy

Knowledge Dimension	Cognitive Process Dimension	Action Verb
Conceptual	Understand	Explain (L2)
Procedural	Evaluate	Justify (Evaluate-L3)
Factual	Understand	Recognize (L1)
...	...	...

17

Session No.	Planned Date	Topic	Sub Topics	Knowledge Dimension	Action Verb
4	19.02.2021	Supply Functions	Examine the concept of supply	Factual	Explain (Understand-L2)
			Factors affecting supply	Procedural	Justify (Evaluate-L3)
			Law of supply	Conceptual	Recognize (L1)
			Determination of equilibrium price	Procedural	Formulate (Evaluate-L3)
			Effects of changes in demand & supply	Metacognitive	Assess (Evaluate-L5)

18

### CO Statements align with Bloom's Taxonomy

Bloom's Levels	Action Verbs	Example Course Outcomes of Managerial Economics
<b>Create</b>	Adapt, Anticipate, Collaborate, Combine, Communicate, Compare, Construct, Create, Design, Facilitate, Forecast, Generate, Initiate, Model, Negotiate, Organize, Perform, Plan, Produce, Propose, Reason, Revise, Resolve, Structure, Substitute	
<b>Evaluate</b>	Assess, Assemble, Build, Choose, Compare, Contrast, Debate, Estimate, Formulate, Generate, Hypothesize, Integrate, Judge, Justify, Manage, Organize, Produce, Prioritize, Prepare, Prioritize, Produce, Propose, Recommend, Structure, Synthesize	CO2: Evaluate production related aspects with the help of PFC, Law of supply, Cost & Break-even analysis, Economics Mixes by using various matrices and tools.
<b>Analyze</b>	Analyze, Appraise, Detail, Determine, Calculate, Categorize, Classify, Compare, Contrast, Correlate, Critique, Explain, Infer, Detect, Dismantle, Distinguish, Examine, Inspect, Inventory, Research, Solve, Summarize, Test	CO1: Analyze consumer behaviour by studying concepts of Utility, Demand, Elasticity and its impact on managerial decision making. CO3: Analyze the types of markets, pricing practices, its effect on business revenues and profits.
<b>Apply</b>	Adapt, Apply, Compute, Coordinate, Demonstrate, Develop, Dramatize, Employ, Establish, Examine, Extrapolate, Illustrate, Implement, Instruct, Interview, Manipulate, Modify, Operate, Order, Practice, Predict, Prepare, Produce, Utilize	
<b>Understand</b>	Arrange, Associate, Classify, Convert, Describe, Discuss, Explain, Exemplify, Identify, Interpret, Locate, Match, Paraphrase, Report, Research, Sort, Summarize, Translate	

**Step 3: Define bloom's level to form the CO statements**

19

### TLP With Knowledge Dimension, Cognitive Levels & CO Number

Session No	Planned Date	Topic	Sub Topics	Knowledge Dimension	Action Verb	CO Number
4	19.02.2024	Supply Functions	Examining the concept of supply Factors affecting supply Law of supply Determination of equilibrium price Effects of changes in demand & supply	Factual Procedural Conceptual Procedural Metacognitive	Explain (Understand-1.2) Prioritize (Evaluate-1.5) Justify (Evaluate-1.5) Formulate (Evaluate-1.5) Assess (Evaluate-1.5)	CO2

CO2: Evaluate production related aspects with the help of PFC, Law of supply, Cost & Break-even analysis, Economics of scale by using various matrices and tools.

20

### How To Write Measurable Course Outcomes?

**AVOID ACTIONS THAT ARE NOT MEASURABLE.**

understand

know

appreciate

**BE SPECIFIC. USE ACTIONS THAT ARE MEASURABLE.**

define

write

calculate

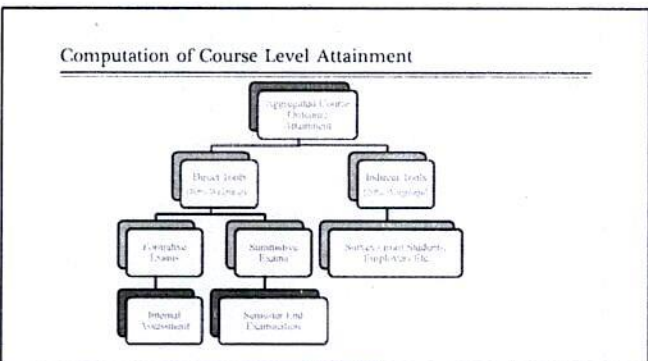

analyze

21

NOT MEASURABLE	BETTER	BETTER
Students will understand the importance of the business environment.	Students will be able to identify the business environment.	Students will be able to identify the business environment and its impact on the business.
Students will know the importance of the business environment.	Students will be able to identify the business environment.	Students will be able to identify the business environment and its impact on the business.
Students will appreciate the importance of the business environment.	Students will be able to identify the business environment.	Students will be able to identify the business environment and its impact on the business.
Students will be able to identify the business environment.	Students will be able to identify the business environment.	Students will be able to identify the business environment and its impact on the business.

22

23

- ### Computation of Course Level Attainment
- Fine mapping of each question to each assignment
  - Group the question by per CO mapping
  - Identify Student Performance Threshold value
  - Compute Question wise attainment
  - Compute aggregated CO Attainment for each CO
  - Compare the CO attainment with Target

24

**CO Attainment of each Question**

---

- Question 1 ----- (4 Marks)
- Question 2 ----- (2 Marks)
- Question 3 ----- (2 Marks)
- Question 4 ----- (2 Marks)

Class Test I

CO1

25

**Threshold value**

---

- It is similar to evaluation of student = Qualify/Disqualify (e.g. minimum 50% of maximum marks to Pass)

But

- For Measuring the attainment level of particular CO = Whether or not the student has achieved the outcome of particular Course

We assume Threshold value 60%

26

**Applying Threshold 60% to each question**

---

Question No.	Marks	Threshold Value
1	4	$= (60 \times 4) / 100 = 2.4$
2	2	$= (60 \times 2) / 100 = 1.2$
3	2	$= (60 \times 2) / 100 = 1.2$
4	2	$= (60 \times 2) / 100 = 1.2$

CO1

27

**Identifying students above threshold**

---

Question No.	Marks	Threshold Value	Students above Threshold (Total Students in a Class=60)
1	4	$= (60 \times 4) / 100 = 2.4$	35
2	2	$= (60 \times 2) / 100 = 1.2$	40
3	2	$= (60 \times 2) / 100 = 1.2$	50
4	2	$= (60 \times 2) / 100 = 1.2$	45

CO1

28

**CO1 attainment computation**

---

Question No.	Marks	Threshold Value	Students above Threshold (Total Students in a Class=60)	Percentage
1	4	$= (60 \times 4) / 100 = 2.4$	35	$= (35/60) \times 100 = 58.33$
2	2	$= (60 \times 2) / 100 = 1.2$	40	$= (40/60) \times 100 = 66.66$
3	2	$= (60 \times 2) / 100 = 1.2$	50	$= (50/60) \times 100 = 83.33$

29

**Level of attainment**

---

Attainment Level 1	60% of students scoring more than 60% marks
Attainment Level 2	70% of students scoring more than 60% marks
Attainment Level 3	80% of students scoring more than 60% marks

**CO1 Attainment for 4 questions**

$= ((35 + 40 + 50 + 45) / 240) \times 100$   
 $= (170 / 240) \times 100$   
 $= 70.83$

30

**Set/Target Attainment level**

• Managerial Economics Target Attainment level is 75%

Question No.	Marks	Threshold Value	Students above Threshold (Total Students in a Class=60)	Percentage
1	4	$(60 \times 4) / 100 = 24$	35	$(35 / 60) \times 100 = 58.33$
2	2	$(60 \times 2) / 100 = 12$	40	$(40 / 60) \times 100 = 66.66$

31

**Benchmarking for Sample Subject : Managerial Economics (MGT 101)**

CO1: Analyze consumer behaviour by studying concepts of Utility, Demand, Elasticity and its impact on managerial decision making.  
 CO2: Evaluate decision related aspects in the light of PPC, Law of Input, Output & Profit maximization. Factors of cost using various techniques and levels.  
 CO3: Appraise the types of markets, pricing practices, its effect on business performance and profits.

Benchmarking submitted by respective Faculty Member

	PO1	PO2	PO3	PO4	PO5
CI05CO1	1	2	1	1	2
CI05CO2	1	2	1	1	2
CI05CO3	1	2	1	1	2

The notation of 1, 2 and 3 stands for Substantially (high), moderately (medium) and slightly (low).  
 The notation of 1, 2 and 3 stands for Substantially (high), moderately (medium) and slightly (low).  
 The notation of 1, 2 and 3 stands for Substantially (high), moderately (medium) and slightly (low).

32

**Understanding affinity levels of Programme Outcomes (PO)**

Affinity Levels	Description of affinity levels	Weightage of affinity levels
3	Substantial	1.00
2	Moderate	0.67
1	Slight	0.33

33

**CO PO Mapping**

Affinity Levels	Description of affinity levels	Weightage of affinity levels
3	Substantial	1.00
2	Moderate	0.67
1	Slight	0.33

	PO1	PO2	PO3	PO4	PO5
CI05CO1	1	2	1	1	2

CO1 Attainment is 70.83%  
 PO5 attainment with respect to CO1 =  $70.83 \times 0.67 = 47.4561$

34

**VISION – MISSION – PEOs – Pos - COs**

Relevance/Consistency/appropriateness of the statements

35

**Vision**  
 To be the top-of-mind value-based institute, providing management professionals with excellence in management education with focus on research, innovation and industry interface.

**Mission**  
 To be the top-of-mind value-based institute, providing management professionals with excellence in management education with focus on research, innovation and industry interface.

To be Top of Mind of the students, parents, Regulatory bodies, companies, partners/ Society – overall image of the institute – in Thane & Mumbai Region (considering MMS)

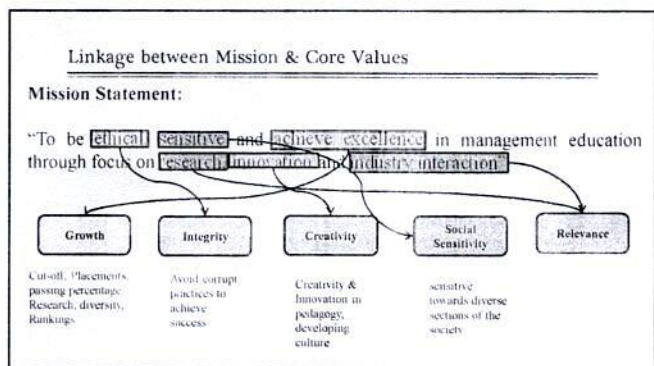

Value-based – to be Successful & Sustainable based on strong foundation of values (ethics, transparency, equality, universal human values etc.)

Nurturing – Not only focusing on information oriented education but on thought based, observation skills, problem solving skills & other H.O.T. thinking levels of the learners with a strong bonding and attachment

Management professionals – including students, MDP (corporate) & FDP (fellow academicians/ teaching fraternity) participants

36

37

Program	Course	Outcomes	Assessments
BBA	Business Administration	<b>PO 1: Leadership</b> Students will demonstrate leadership skills and result in team membership, skills, and role plays.	<b>Management (General)</b> • CO1: Analyze business behaviour by studying financial statements (2-Week, Theory and its impact on managerial decision making) • CO2: Evaluate products, an related aspects with the help of marketing mix of a product line & Brand even available. Examine it with by using various metrics and tools. • CO3: Analyze the types of markets, pricing practices to effect on business income and profits.
		<b>PO 2: Teamwork</b> Students will demonstrate teamwork and communication skills in group projects and industry interaction.	<b>Business Statistics</b> • CO1: Understand and compare the statistical techniques and tools used in business. • CO2: Apply the business statistics tools for business research. • CO3: Create models using relationship between dependent and independent variables. • CO4: Infer the decision support provided by the analysis technique.
		<b>PO 3: Innovation</b> Students will demonstrate innovation in research, development and industry interaction.	<b>Business Mathematics</b> • CO1: Application of basic IT and computer techniques & tools in business context and develop culture of technology usage. • CO2: Use Data Visualization is important for effective decision making.
		<b>PO 4: Social Sensitivity</b> Students will demonstrate social sensitivity in their professional environment.	<b>Business Strategy</b> • CO1: Understand and compare the statistical techniques and tools used in business. • CO2: Apply the business statistics tools for business research. • CO3: Create models using relationship between dependent and independent variables. • CO4: Infer the decision support provided by the analysis technique.

38

- ### Action Required
- Course Outcomes statements as per **Knowledge Dimension & Cognitive Dimension to be tabulated and communicated to students**
  - **TLP** to capture session wise break up in **Taxonomy Table**
  - Each **Course Outcomes** must have their **own Target (%)**
    - To find Slow Learner
    - To take Remedial actions at right time in Continuous Assessments
  - **CO PO Benchmarking** submitted by faculty members must be **reviewed by expert committee** to check alignment with PEO, PO, Mission & Vision

39

# Teaching Learning process

Journal Club Presentation

01/02/2021

Dr. Pallavi Chandwaskar

# Overview

- TLP defined
- Objectives of TLP – Teaching Learning Plan
- Role of TLP in OBE (Outcome-based Education)
- Hierarchy of outcomes
- Vision and Mission/PEOs/POs/ COs
- Framework for Outcome based education
- NBA's 12 Graduate Attributes
- Relationship between Vision, Mission, PEOs, POs and COs
- TLP Processes and learning levels of Bloom's taxonomy
- Benchmarks and NBA Requirements

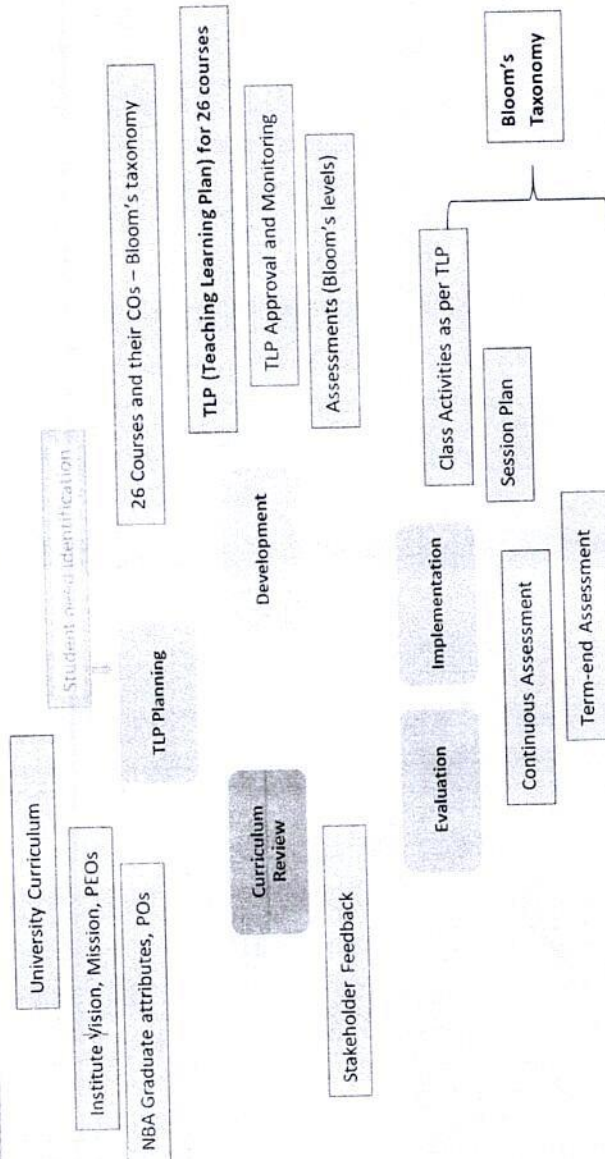

## Teaching Learning Process defined...

*“Combined processes where an educator assesses learning needs, establishes specific learning objectives, develops teaching and learning strategies, implements plan of work and evaluates the outcomes of the instruction.”*

Source: Holz M., Guntuku D. (2015) IGI Global Dictionary – from chapter: *Current and Future Trends in Higher Education Learning: Implications for Curriculum Design and Delivery* – from *Handbook of Research on Enhancing Teacher Education with Advanced Instructional Technologies*

# Teaching learning process

## Objectives of TLP (Teaching learning plan)

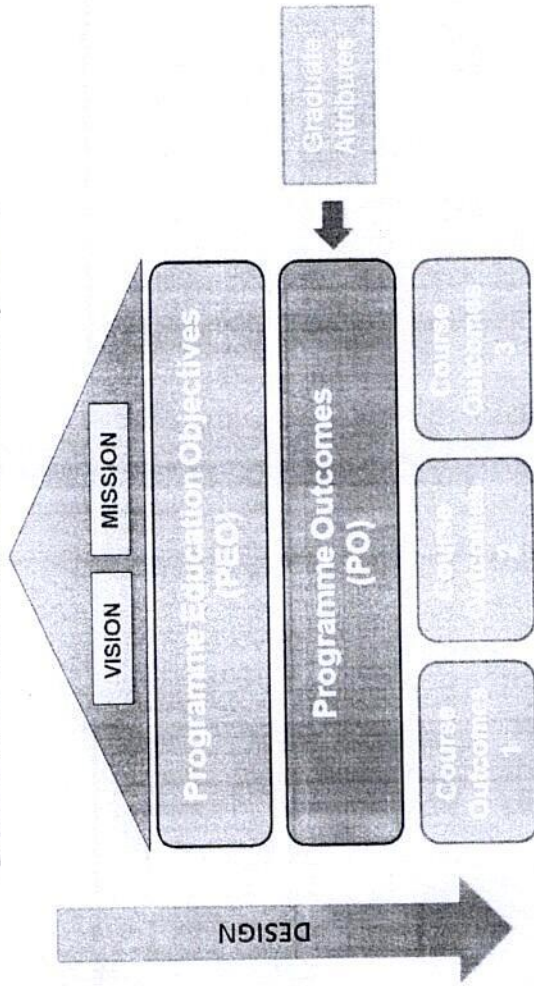

- \* To provide a clear and simple understanding of What , Why and How of a course
- \* Helping student to be prepared for the course conduct and elaborating on how it will be conducted
- \* Elaborates upon the pedagogy to be used
- \* To facilitate the student to fulfil learning objectives/ course outcomes

# Hierarchy of Outcomes: NBA

## Key Constituents of Outcome-based Education (OBE)

Source: NBA website

# BRIMS Vision and Mission

- **VISION:** To be a top-of-mind value-based institute, nurturing management professionals.
- **MISSION:** To be ethical, sensitive and achieve excellence through management education through focus on **research, innovation and industry interaction.**

## Proposed PEOs for MMS at DR VN BRIMS

- **PEO (Programme Educational Objectives) :** PEOs are broad statements that describe the career and professional achievements that the program is preparing the graduates to achieve within the first few years after graduation.
- **PEO 1 –** Management graduates will demonstrate competitiveness and create enough value in the business function and allied work.
- **PEO 2 –** Management graduates will demonstrate effective communication and problem-solving skills in professional environment while handling a diverse team.
- **PEO 3 –** Management graduates will take initiatives in their respective area of work and will use their learnings for societal development.

# Programme Outcomes - MMS

PO1 : Nurture leadership skills, team-membership skills and mutual trust.

PO2 : Demonstrate decision-making ability.

PO3 : Ability to develop culture of technology-Usage.

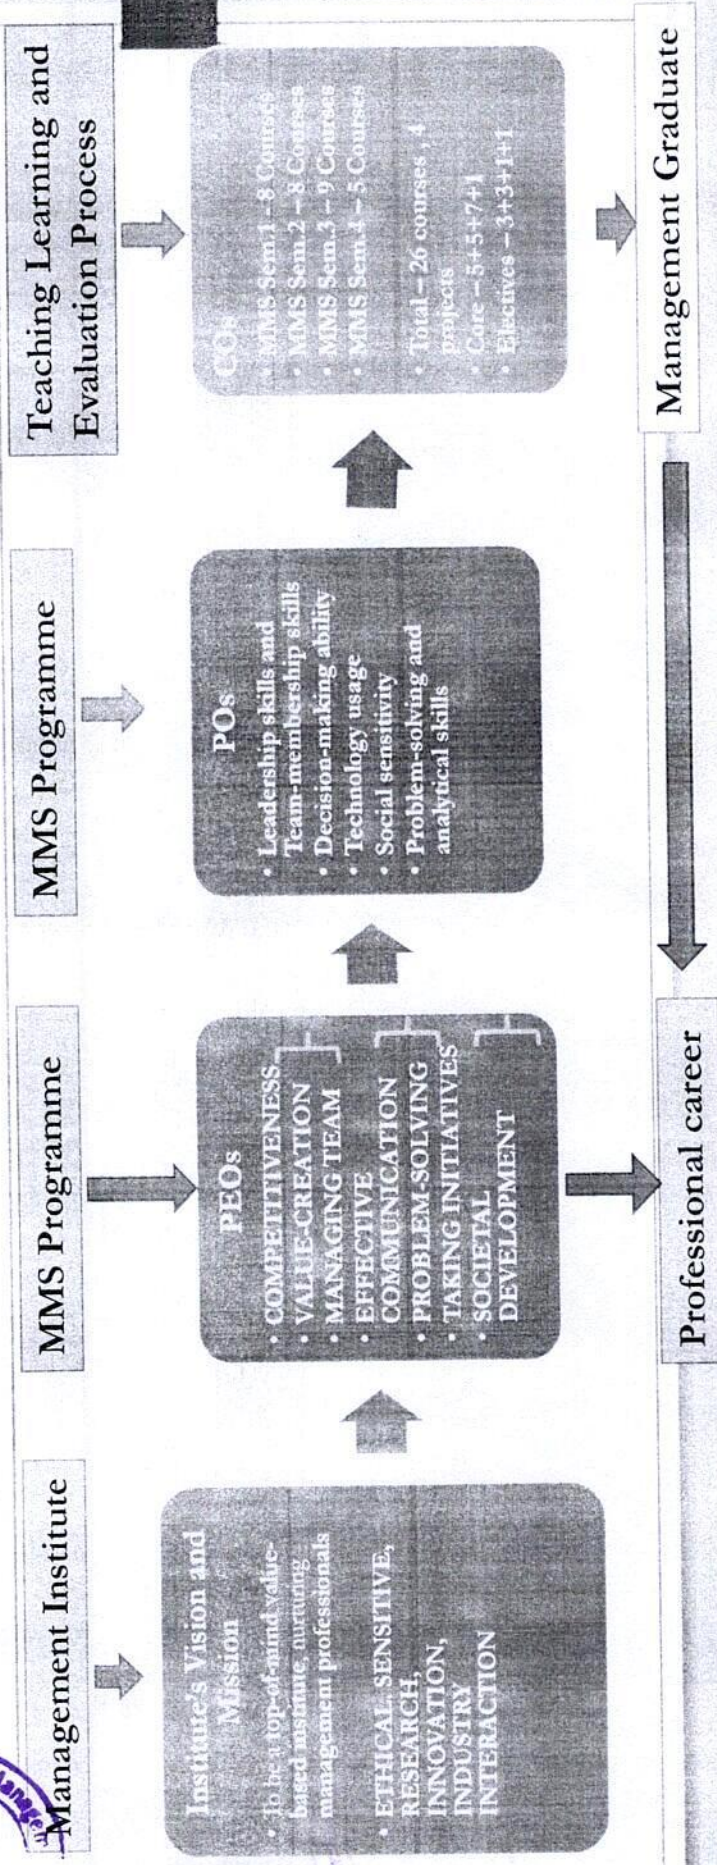

PO4 : Inculcate social sensitivity among students.

PO5 : Integrate and apply business knowledge and management techniques for problem-solving / analytical skills.

# Framework for outcome-based education

# NBA – 12 Graduate Attributes

Management knowledge

Management and society

Problem analysis

Environment and sustainability

Design and developing solutions

Ethics

Investigation of problem

Individual and team work

Modern tool usage

Communication

Project and Finance

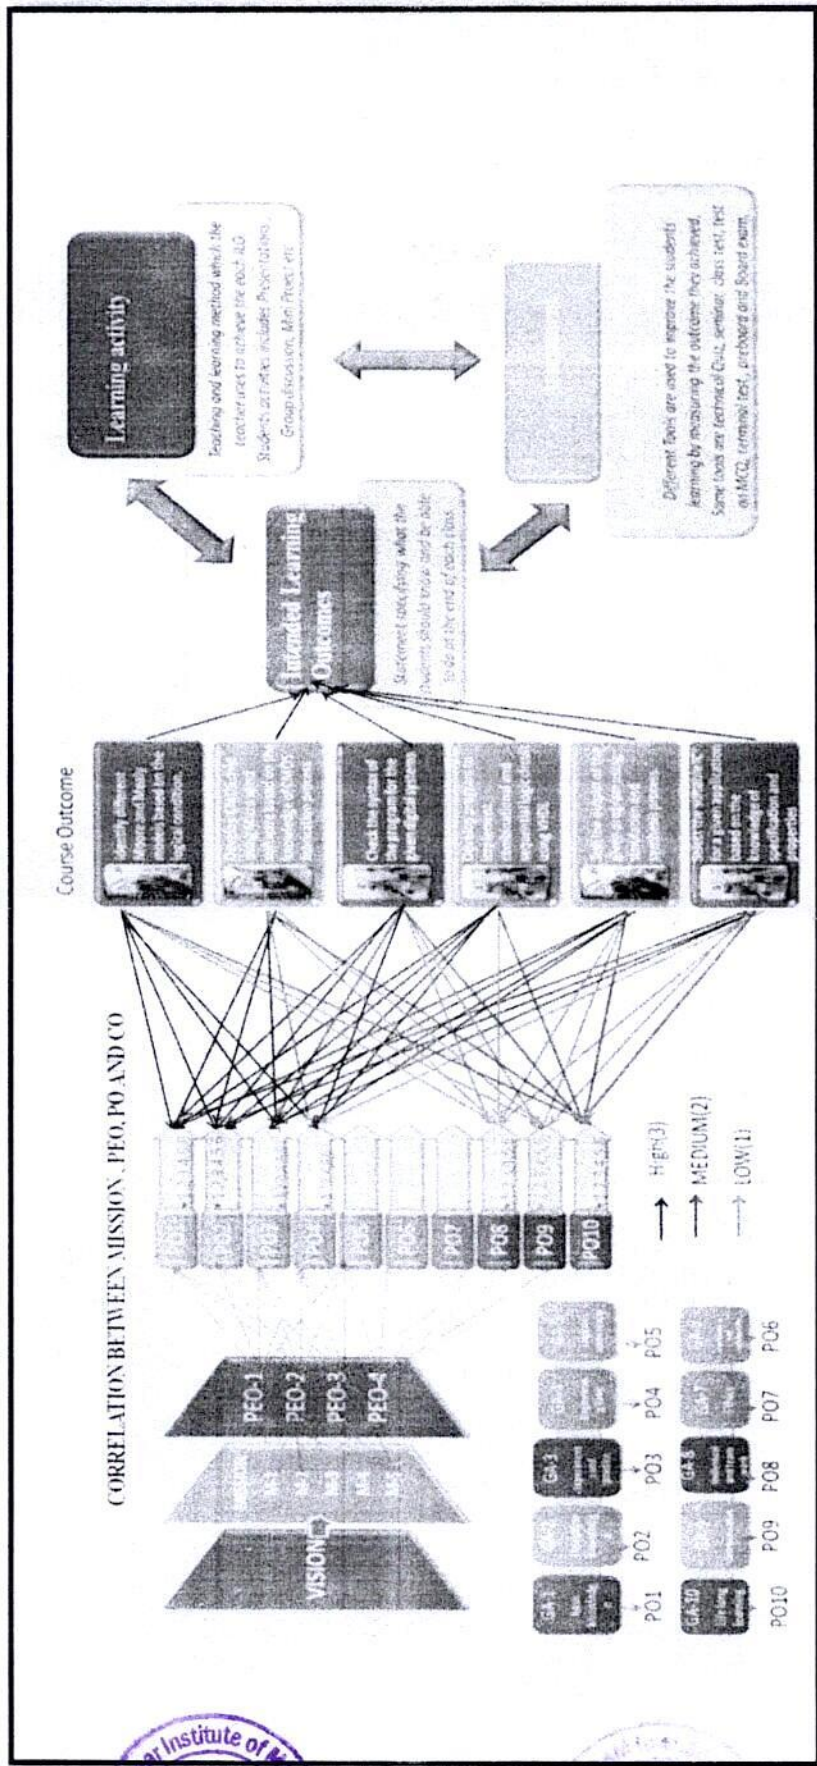

Life-long Learning

# NBA – 12 Graduate Attributes mapped to POs

Source: D'Cruz L. (2017) Transition from Traditional to Outcome Based Education- A Case Study, IOSR Journal of Research & Method in Education (IOSR-JRME)

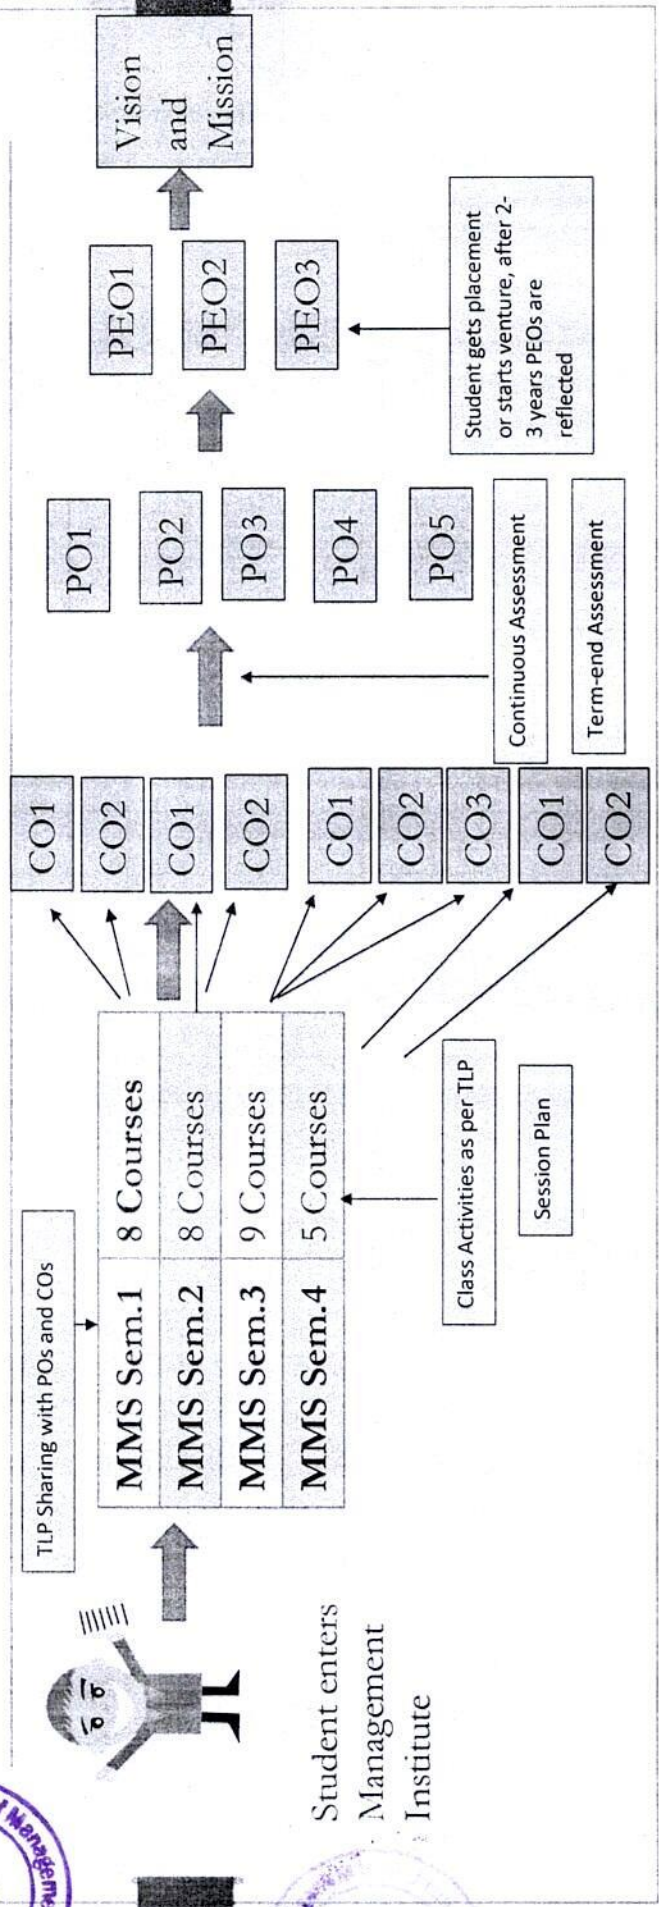

# Teaching Learning plan

TLP processes – Approval and Monitoring

# Journey of a student through TLP

# Deviations

• Difference in the planned and actual delivery

• Types –

• Process Deviation

• Content Deviation

• Mechanism to avoid/reduce deviation

• ADC Review meetings

• TLP monitoring process

• Mid-term Feedback

# Exploring Six Levels of Bloom's Taxonomy: Learner's Perspective

Level 6	Can the learner create a new product or point of view?	assemble, construct, create, design, develop, formulate, write
Level 5	Can the learner justify a stand or decision?	appraise, argue, defend, judge, select, support, value, evaluate
Level 4	Can the learner distinguish between different parts?	appraise, compare, contrast, criticise, differentiate, discriminate, distinguish, examine, experiment, question, test
Level 3	Can the learner use information in a new way?	choose, demonstrate, dramatise, employ, illustrate, interpret, operate, schedule, sketch, solve, use, write
Level 2	Can the learner explain ideas or concepts?	classify, describe, discuss, explain, identify, locate, recognise, report, select, translate, paraphrase
Level 1	Can the learner recall or remember the information?	define, duplicate, list, memorise, recall, repeat, state

# Pedagogy Benchmarks

S. no.	IIM-C	IIM-A	IIM-K	HBS
1	Case Discussions	The Case method	Case studies	HBS Case Method
2	Analytical pedagogy Business simulations	Group work	Simulations	500 cases read and analysed during 2 year MBA programme
3	Debate and interactive discussions	Live industry projects to groups	Wide range of electives offered – selected through bidding process	The Field Method – Field immersion experience projects
4	Introduction of innovative elective courses as per the latest developments in the field of management	Cases are reviewed every year to reflect current managerial practices and trends		Student Engagement through case studies

# NBA Requirements from TLP

Criteria	Requirement	Weightage
1.2	PEO Statements	5
1.3	Dissemination of Vision, Mission and PEOs to stakeholders	10
1.4	PEO Formulation Process	15
1.5	Consistency of PEOs with mission	15
3.1	Attainment of POs	50
3.2	Attainment of COs	50
4.1	Curriculum	25
4.2	Learning Process	100

# NBA Requirements from TLP

Criteria	Requirement	Weightage
4.1.2	Appropriateness the gaps identified in University curriculum and actions taken to bridge the gap	15
4.1.1	The process used to identify extent of compliance of the University curriculum for attaining the Program Outcomes	10
4.2.1	Improving instructional methods and using pedagogical initiatives Methodologies to support weak students and encourage bright students Student feedback of teaching learning process and actions taken	40
4.2.2	EVALUATION PROCESS – from PO-CO attainment point of view	40
4.2.3	Quality of Student Project Reports - Types and relevance of the reports and their contribution towards attainment of POs	20

*Thank You*

# Topic : Academic Planning

# ACADEMIC PLANNING

*Failing To Plan Is Planning To Fail* Nilsh Rajc

1

## SYSTEM APPROACH TO MANAGEMENT

Management is the process of working with **people and resources** to accomplish **organizational goals**

- Source: Koontz, H. (2012). *Essentials of management*. Tata McGraw-Hill Education.
- Bateman, J. S. & Snell, S. (2002). *Management: Competing in the New Era*. New York.

2

## PLANNING

- According to dictionary To form a scheme or method for doing, achieving (Webster's Collegiate)
- Planning is the process of setting **objectives** and determine **how** to accomplish them
  - ◊ Objectives: They are the specific results that one wishes to achieve
  - ◊ Plan: It is the statement of intended means for accomplishing objectives

Source: Steiner, G. E. (1964). How managers plan: the analysis of managers' activities. *Long range planning*, 1(1), 8-18.

3

## COMPONENTS OF PLANNING

The pyramid is divided into several levels:

- Mission:** Why we exist
- Vision:** What we want to be
- Goals or purpose:** What we must achieve to be successful
- Objectives:** Specific outcomes expressed in measurable terms (NOT activities)
  - O1
  - O2
- Initiatives:** Planned Actions to Achieve Objectives
  - A11, A12, A13
- Measures:** Indicators and Measures of success
  - M1, M2, M3
- Targets:** Desired level of performance and timelines
  - T1, T1, T1

4

## PLANNING AND CONTROLLING

The flowchart consists of two rows of boxes:

- Top Row (Planning):** Establishing Objectives, Preparing Action plan, Adjustment in action plan, Evaluate objectives: keep or change.
- Bottom Row (Controlling):** Creating Standards, Monitor, Change, progress and results, Compare with standards, Evaluate and make necessary adjustments.

Arrows indicate the flow: Establishing Objectives leads to Creating Standards; Preparing Action plan leads to Monitor, Change, progress and results; Adjustment in action plan leads to Compare with standards; Evaluate objectives: keep or change leads to Evaluate and make necessary adjustments.

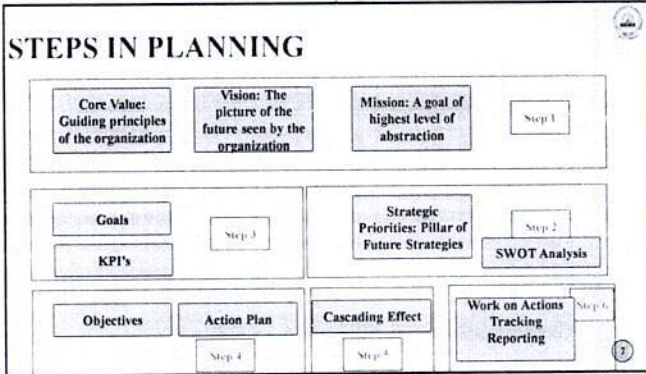

5

## ACADEMIC PLANNING

- Academic planning also known as educational master planning or academic master planning outlines a college's or university's overall academic goals and how those goals will be met

6

7

### ACCREDITATION BODIES

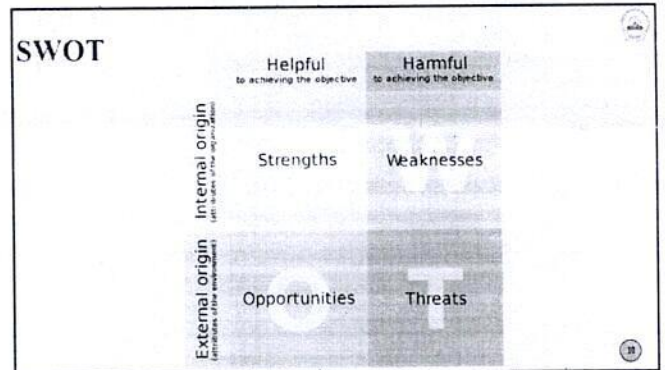

National Excellence				International Excellence	
AICTE	NBA	NAAC	NIRF	EFMD EQUIS	ASSOCIATION OF MBAs
Governance & Leadership Infrastructure & Facilities	Governance & Leadership Infrastructure & Facilities	Governance & Leadership Infrastructure & Facilities	Financial Resources (TLR)	Governance & Leadership Institutional Support	Governance & Leadership Standard Operating Process
Schedule of Academics	Education Objectives Program Curriculum Graduate Attributes	Curriculum Aspects Teaching & Learning Student Support & Outcomes	Teaching & Learning (TLR) Outreach and Inclusivity (IOI) Resources (TLR)	Program Objectives Program Curriculum Student Outcomes	Program Design Teaching & Learning Graduate Outcomes
Faculty Information Legal Aspects	Student Support & Performance Research & Innovation Continuous Improvement	Student Outcomes Research & Innovation Institutional Values	Graduation Outcomes (GO) Research and Professional (RP) Perception (PR)	Faculty Information Students Performance	Faculty Quality & Qualification Student Info & Performance Life Long Learning Program Curriculum
	First Year		Evaluation (GR)	Continuous Improvement Other Facilities	Evaluation

8

### IMPORTANT AREAS OF PLANNING

Symbiosis Centre for Management and Human Resource Development	SRM Institute of Science and Technology	NMIMS	University of Delhi	IIT
Student Development				Enhance student experience
Student Placement				Enhance student experience
Human Resources			Engagement with stakeholders: Aligned the key stakeholders: attract students and teachers across the globe	Enhance student engagement
Continuous Evaluation	Collaboration Internationalization	Host Seminars with global authorities Students and Faculty from globe	Attract international students and faculty Advance frontiers of knowledge Enhance diversity	Attract international students and faculty Advance frontiers of knowledge Enhance diversity
Intellectual Capital Development	Academic Excellence Innovative course	New programme according to needs Research	Research relevant to government, industry and society	Broaden educational area Broaden funding base
Specialization in Data Analytics	Research	Entrepreneurship and innovation	Integrate technology for delivery of programs	Enhance engagement with society and industry Improve internal support systems
IT Infrastructure Physical Infrastructure Enhancement of Academic Learning				

9

10

### INSTITUTE SWOT ANALYSIS

**Strengths:**

- Value centric education and also known in the market place accordingly. Traditions of VPM (Thane) duly followed - regulatory compliance, transparency, fairness and top management support for institutional initiatives.
- Academic excellence respected, cherished and desired and ways and means of rising above and beyond excellence always on the anvil - continuous improvement is the buzz word at DRVN BRIMS.
- Research orientation is very strong leading to the publications of large number of research monographs and contributions since inception and efforts are on to bring it up to global standards.
- Process driven, system based, technology savvy education leading to industry ready and relevant students.
- Approach towards education is progressive and forward looking to ensure value creation for all stakeholders.

11

### INSTITUTE SWOT ANALYSIS

**Weakness:**

- Faculty have limited, hands-on exposure and experience of industry. Very ambitious and fast track, achievement motivation, faculty lacking. Rather slow response and sensitivity to emerging situations - may be exploiting strength or overcoming weakness or seizing opportunities or pre-empting threats.
- Customers come from limited range - Central Railway (Thane to Karjat and Thane to Ghatkopar), Navi Mumbai and few from western railway suburbs - lack of PAN Mumbai, PAN Maharashtra, PAN India presence.
- Infrastructure meets statutory requirements but continuous upgradation of facilities to come up to speed with states-of-the-art is not as fast as it should be.
- Administration / Information and Communication Technology services to internal and external customers need to be transparently and visibly of value creating quality as perceived by end users of services.
- Placements are yet to come up to expectations of all stakeholders though sustained efforts are on.
- Alumni links improvement rather slow. Networks of alumni interface institute rather poor.
- Want of adequate consultancy assignments and third party work.

12

## INSTITUTE SWOT ANALYSIS

**Opportunities:**

- Exchange programs with other reputed institutes at home and outside India for progressive value creation for all stakeholders - teachers, students and the institute
- Efforts towards brand building for consolidating and improving the present position. The objective is to become top-of-the-mind, recall brand with respect to quality of the faculty, quality of students, quality of research papers, quality of outcomes of consultancy assignment, quality of training programs and overall quality of the Institutes contribution to the management movement, thus making BRIMS a PAN, Mumbai, Maharashtra, India /Asian and Global Brand
- Developing an entrepreneurship cell with a view to nurture our students as potential employers rather than job-seekers in line with Government policy
- For the time being, future expansion, diversification restricted to autonomous courses, MDPs, EDPs and third party work
- Emerge as a leader to evolve an approach to education which can combat the arrival of industry 4.0
- Learning laboratories in functional areas needed - Finance, Behavioural Science other areas to be a Top-of-the-mind Brand

13

## INSTITUTE SWOT ANALYSIS

**Threats:**

- Increasing competition for MMS program due to laxity of norms by competitors - delicate balance between strict compliance and laxity
- Mechanism to capture environmental change has to be built in to the organisational culture making rate of learning always greater than change. The non-presence of this dimension is a great threat
- Continuous unemployment scenario and lack of attractive jobs may adversely affect the future of MBAs. The focus and role of management institutes may have to change from mere lifelong learning to job providing and creating entities

14

## 11 PROCESS IN BRIMS

- Prof. Dr. Smita Jape -- Research
- Prof. Dr. Arloph Johnviera -- MDP
- Prof. Krupal K. Punjani -- Innovation incubation Cell / Entrepreneurship
- Prof. Mahesh Bhanushali -- Placement
- Dr. Pallavi Chandwaskar -- IQAC
- Prof. Vibhuti Save-- Examination
- Dr. Meenakshi Malhotra-- Students Engagement
- Prof. Kanchan Akshay-- Staff and faculty development
- Mr. Vaibhav Pandit -- CSR
- Prof. Mahesh and Prof. Pravin Narang -- Alumni
- Prof. Sandip Moghe -- Technology
- Prof. Deepthi Perival --- Value added courses

15

## PROCESS SWOT ANALYSIS

	Faculty	Research	MDP, Consultancy	Third party	Student Development	Examination	IQAC	HR	IT	Alumni	Staff and Faculty Development	CSR	Value Added Courses
<b>Strength</b>					Students representing at national competitions								
<b>Weakness</b>					Only few students actively participate in extra-curricular activities themselves don't take initiative of participation								
<b>Opportunity</b>					Representation of students in national and international level competitions								
<b>Threats</b>					Skill development								

16

## 2021-22: OBJECTIVES

Faculty	Research	MDP/ Consultancy	Third party	Student Development	Examination	IQAC	HR	IT	Alumni	Staff and Faculty Development	CSR	Value Added Courses
<b>Objective 1</b>				To enhance the skills of the students for their professional growth								
<b>Objective 2</b>				To inculcate self reliance and boost the confidence among students for their all round development								
<b>Objective 3</b>				To enable effective communication between students and the Institute								

17

## WHAT IS BUSINESS CONTINUITY PLANNING (BCP)?

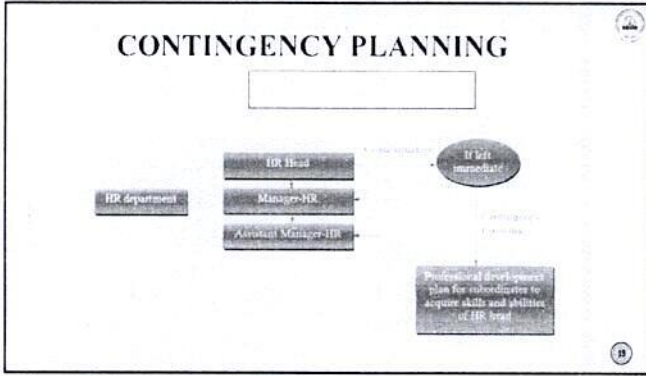

The plan ensures that personnel and assets are protected and are able to function quickly in the event of a disaster

These circumstances and limits include:

- Defining worst-case scenarios used for business continuity planning
- Approving the funding and staffing of the company's BCP Program

18

19

# THANK YOU

20

Journal Club Session	:	Dr. Duloph Johnviera

**Journal Club Presentation on**  
**Meeting the Criteria of Quality**  
**Research Journals**

by  
**Prof. Krunal K. Punjani**

# Research Paper/ Article

- Research paper: Reports on any type of research undertaken by the author(s), including:
  - The construction or testing of a model or framework
  - Action research
  - Testing of data, market research or surveys
  - Empirical, scientific or clinical research
  - Papers with a practical focus

- *Emerald Publishing*

- Manuscripts reporting original research, typically containing between 6,000 and 12,000 words

- *SAGE Publishing*

- Articles containing developments on a specific topic, significant data, methods and outcomes

- *Elsevier*

# Structure of the Research Paper

- Title
- Abstract
- Key words
- Introduction
- LR – Theoretical background and Hypothesis
- Research Methodology
- Measures
- Data analysis
- Results
- Discussion
- Implications – Theoretical & Practical
- Limitations and Scope for future research
- Conclusion
- References
- Appendix/ Exhibits

# Attributes of Quality Research Paper

- **Questions to answer while deciding the final research topic:**
  - What is the importance of the research topic to the existing body of knowledge?
  - What are the research questions and its relevance to different readership groups?
  - What are the significant contributions that the research endeavour makes to the existing literature(s)?
  - Which methodologies and measurement procedures will ensure capturing high-quality data for answering the specified research questions?
  - What meaningful story can be told by addressing the expressed research questions?
  - What will be the appropriate targeted journal for a research endeavour?

# Attributes of Quality Research Paper

- **Five distinct criteria:**
  - Significance: Taking on the “Grand Challenges”
  - Novelty: Changing the Conversation
  - Curiosity: Catching and Holding Attention
  - Scope: Casting a Wider Net
  - Actionability: Insights for Practice

# Indexing bodies of Quality Journals

- UGC CARE List
- Scopus
- ABDC (Australia & New Zealand) - A\*, A, B, C
- ABS (UK) – 4, 3, 2, 1
- CNRS (France) – Rank 1, Rank 2, Rank 3, Rank 4
- FT50 – Financial Times 50 Journals
- UT Dallas List of Publications

# Major reasons for the rejection of manuscripts by quality journals

“Why referees reject manuscripts”

- Journal of hospitality & tourism research (2007)

Scopus & ABDC ‘A’ journal

## Introduction & LR

- The top information sciences journals, accept only 10% to 15% of manuscripts (Straub, Ang, & Evaristo, 1994)
- Leading marketing journals reportedly accept around 10%, with 80% rejected at the first review round (Summers, 2001)
- Some papers are bad fits for the journal (Aims & Scope) and would be received more favorably had they been submitted elsewhere.

## Introduction & LR

- Other Major reasons: Contribution to knowledge, writing style, and the development of the theory or framework were cited most often by these authors (Czyzewski & Dickinson, 1990; Glogoff, 1988; Gorman, 2000; Kassirer & Champion, 1994; McConnell, 2000; Pierson, 2004; Straub et al., 1994).
- Contribution to knowledge, logical rigor, and theory were identified consistently as high-order factors in information sciences manuscripts, regardless of the method adopted in the research (Straub et al., 1994).

## Introduction & LR

- Holschuh (1998) identified following major reasons:
  - Research that does not contribute anything new to the field of study
  - Problems in the design
  - Implementation of the research
  - Problems related to the quality of the writing itself.
  - Many authors have difficulty in stating clearly the importance of the study and its significance

## Introduction & LR

- Yuksel (2003) surveyed 43 reviewers and identified eight key areas reviewers look for when examining empirical papers.
  - Contribution to knowledge
  - innovation and originality
  - Meeting journal objectives
  - clarity of writing
  - the use of literature
  - the quality of the argument made
  - research methodology and data analysis
  - research implications

## Introduction & LR

- Bonjean and Hullum (1978) conducted a systematic analysis of 600 rejection letters written to sociologists, political scientists, and economists who submitted papers to a leading social sciences journal.
  - Unimportant or insignificant contributions were identified most often, reflecting about 30% of the reasons given.
  - Specifically, papers were rejected because they were seen to add nothing new to the knowledge and understanding of the subject, or made little or no attempt to relate the empirical research to some theoretical construct.
  - Methodological problems ranked second and represented about one fourth of all reasons for rejection.
  - The use of an unsound theoretical framework ranked third, followed by the failure of the manuscript to meet the journal's criteria and poor presentation.

## Introduction & LR

- Bordage (2001) conducted a content analysis of reviewers' comments on 123 manuscripts receiving negative comments
  - Problems with the results section were identified most frequently, due in large part to the inappropriate use of statistics and the mis-, over-, or under interpretation of the results.
  - A failure to identify the problem statement clearly and frame it in the literature emerged as the second most commonly cited reason.
  - Weaknesses in the instrumentation, data collection, and sampling ranked next.

## Methodology

- A quantitative analysis of 373 referee reports, since 2000, where rejection or major revisions were recommended to 76.5% of submissions.
- 104 criteria were identified that could be grouped into 17 broad categories.
- Nine of these categories relate to specific sections of the paper, such as the abstract, introduction, literature review, method, sampling, data analysis, discussions, conclusions, and references.
- Other eight categories addressed more fundamental issues relating to the paper's significance, its writing style, the appropriateness for the journal, overall organization, rigor, whether the paper was plagiarized in whole or in part, whether it followed the journal guidelines, and finally, whether any sections were missing.
- Content analysis (i.e. a technique used for gathering and analyzing the content of text) was done by the 5 authors – each of them reviews between 25 and 30 manuscripts annually, and have been appointed to more than 30 editorial boards, and have collectively published more than 250 refereed journal articles

# Findings

Table 1  
Rank Order of Deficiencies Cited in Manuscripts (% of manuscripts reviewed)

Category	% of Manuscripts
Methodology	74.3
Significance / "so what"	60.3
Writing style	58.4
Literature review section of paper	50.9
Data analysis section of paper	42.1
Organization	34.6
Quality and rigor	30.0
Sampling	29.2
Conclusions section of paper	27.6
Discussions section of paper	25.2
Reference section of paper	23.6
Appropriateness of the paper for the journal	16.1
Failure to follow journal guidelines	14.2
Introduction section of paper	14.2
Manuscript is incomplete (sections missing)	7.0
Abstract section of the paper	3.2
Paper plagiarized or published elsewhere	.8

# Findings

Table 2  
Methodological Issues

Issue	% of Manuscripts
Method not explained, explained poorly or in a confusing manner	32.2
Terms not defined well	19.8
Method chosen is weak, unreliable, or problematic for the problem being studied	18.5
Research instrument or questionnaire not explained or explained poorly	15.0
Wrong method	9.4
Poor operationalization of variables and/or selection of variables not justified	8.0
Poor questionnaire design	7.2
Method not justified if justification is needed	5.9
Sample size calculated incorrectly	5.1
Lack of available data, including small dataset, or unreliable data	5.1
Limitations in method not stated	5.1
Old dataset used	3.8
Poor hypothesis formulation	2.9
Failed to explain data source	2.7
Irrelevant information included in method section (i.e., results)	1.9
Research instrument wrong and/or cannot answer question	1.3
Unethical method used	.9
Does not understand method	.3

## Findings

- Two broad categories can be observed:
  - Failure to explain the method adequately
  - Technical concerns about the validity of the method chosen or its application
- One in five manuscripts adopted a method that was unsuitable for the type of research undertaken
- One in 10 manuscripts simply used the wrong method

## Findings

- Many authors appear to be genuine enthusiasts of the topic being examined or the method used. Their enthusiasm seems, at times, to curb their ability to analyze critically the validity of the method or the reliability of the results it produces
- **E.G. 1** a manuscript “proved” the potential market for a special interest product was 200 times larger than the existing, mature market – received following comment
  - *“Simply stated the results are incredible in the sense of being unbelievable . . . A much more interesting paper would be to write a cautionary tale about the risks of conducting such research using a naive instrument and flawed methodology that concludes enormous market potential when, in reality, none exists.”*

## Findings

- **E.g. 2** Likewise, an advocate of a particular forecasting technique believed it could predict the impact of periodic shocks on tourism systems, even though the data showed clearly this was not the case. The following comment was offered:
  - *“rejection of the paper is recommended, as the author demonstrates conclusively that the [xyz] model is not a valid predictor for [abc] catastrophic event . . . The author could re-write the paper showing how poorly forecasting models work in forecasting catastrophic effects”*

# Findings

- Problems with sampling were also identified in about 30% of cases

Table 3  
Sampling Issues

Issue	% of Manuscripts
Sample size and/or population poorly explained	16.4
Sample too small	8.0
Wrong population or sample selected and/or failed to represent the results/response rate too low	6.2
Sample size not stated	1.3
Misuse of terms (i.e., random when convenience was used)	1.1
Attempt to obscure flaws in sampling	.3

# Findings

Table 4  
Significance / So What

Issue	% of Manuscripts
Study fails to make a significant contribution to literature and/or lacks "so what" implications	45.6
Nothing new and/or replication of other work	13.4
No purpose or need for this study	.3

- Around 60% of the manuscripts were rejected due to Significance and/or "so what" issue

## Findings

- Editors reinforce *“a paper must make a substantive contribution, either theoretically or methodologically or it should be rejected”*
- Some papers are simply superficial, leading one reviewer to write *“this manuscript reads like a student’s term paper. Nothing new is offered. The information in the paper is pretty much common sense and has been published in textbooks and earlier journal articles.”*
- Another comment: *“the authors wander far from the stated title and objectives of the paper. Indeed, they seem more intent on trying a variety of qualitative and quantitative statistical methods rather than answering the research question.”*

# Findings

Table 5  
Writing, Organization, and Rigor

Quality of Writing	%	Organization of Paper	%	Rigor	%
Poor, sloppy grammar, punctuation, spelling, proofreading	37.3	Tables, figures, and diagrams presented poorly	18.0	Contains factual errors, unsubstantiated arguments, or misleading information	16.4
Inappropriate wordings and/or terms used	11.0	Too much superfluous information and/or repetitive	7.5	Overall lack of rigor throughout	9.9
Inappropriate title used	9.1	Misdirected, confusing presentation and/or lacking in flow	4.8	No empirical testing of ideas and/or hypotheses	3.2
Quality of English writing (not readable)	6.2	Too many tables, figures, and diagrams	4.3	Ignored existing literature sources	2.7
Paper is overwritten or underwritten	5.4	Sections not integrated	3.8	Fundamentally flawed in conceptualization	2.4
Did not focus on argument made and/or stated title	4.3	Trying to do too much and/or focus in one issue, or divide into multiple papers	2.7	Project sliced too thin	.8
Lack of comprehensibility and/or could not determine the argument being made	3.2	Poor arrangement of subdivisions	2.4		
Shallow and/or insufficient scope of argument	.3	Problematic numbers	2.4		
		Irrelevant tables included	1.1		
		Failure to provide sufficient details	.5		

## Findings

- Manuscripts replete with spelling and grammatical errors and those that are not carefully proofread are likely to receive a negative reaction from the referee.
- *“There are numerous grammatical and logical faults throughout the entire manuscript. I have basically stopped copy-editing the manuscript after the first sentence. The author should have found a professional editor to proofread the manuscript before sending it to a refereed research journal.”*
- *“Careless editing—how can an article be submitted with question marks on references—should reviewers make a guess?”*
- For Poor Structure: *“the paper never really gets started. By page 8, the authors are still telling us what they intend to do in the paper. By page 18 the reader is still waiting to see what the paper is all about.”*

# Findings

Table 6  
Literature Review

Issue	% of manuscripts
Failure to place the study in a broader context	25.7
Failure to establish theoretical framework, if needed	12.6
Old and/or outdated sources	8.3
No critical evaluation of the literature	5.9
Literature review not relevant to study	4.3
Poor referencing	3.8
Did not cite key sources	3.2
Too short or too long	1.9
Repetitive	.8
Reference stacking (too many references for too few points being made)	.3
Plagiarism	.3
Contradictory—the literature review argues against itself	.3

## Findings

- About one half of the rejected manuscripts had weak literature reviews.
- Two key roles of the literature review, contextualization and conceptualization, were often poorly addressed
- One manuscript was rejected because “this paper is concerned with [a certain type of] tourism but it does not mention a single published study in the area”
- Another one was not supported because “the author ignored completely the latest development in tourism [topic].”

# Findings

Table 7  
Analysis, Discussions, and Conclusions

Analysis	%	Discussion	%	Conclusions	%
Results interpreted incorrectly	18.5	Unsubstantiated claims or editorial comments made	9.4	No implications stated and/or weak conclusion	11.5
Mode of analysis poorly explained	9.9	Discussion is contradictory and argues against itself	4.8	Conclusions not warranted from data	8.0
Does not answer question	9.4	Findings are not related to the study	4.6	No recommendations or recommendations too simplistic, shallow, or wrong	6.4
Wrong technique used	7.5	Lacks depth and/or too simple	3.8	Conclusions not relevant to paper	2.7
Technique used is too simple for the journal	2.7	Findings do not flow logically from the data	2.1	Not integrated in paper	3
Technique used inappropriately	2.4	Irrelevant information included (i.e., results)	1.9		
Misuse of terms (i.e., significant)	1.9	Validity tests not conducted and/or poorly conducted	1.3		
Failure to analysis sample size and/or population	1.3	Repetitive	1.3		
Technique not justified, if required	.8	Too much information. The story gets lost in the minutiae of the data	.8		
Fail to provide statistical results	.8	Findings not related to the literature	.8		
Confusing presentation of the data	.5	Does not answer question	.5		

## Findings

- Poor data analysis affected about 40% of rejected manuscripts, whereas deficiencies in the discussion and conclusions sections affected about one fourth each.
- Discussion and conclusions sections often include material that is not relevant to the study or cannot be warranted by the data.

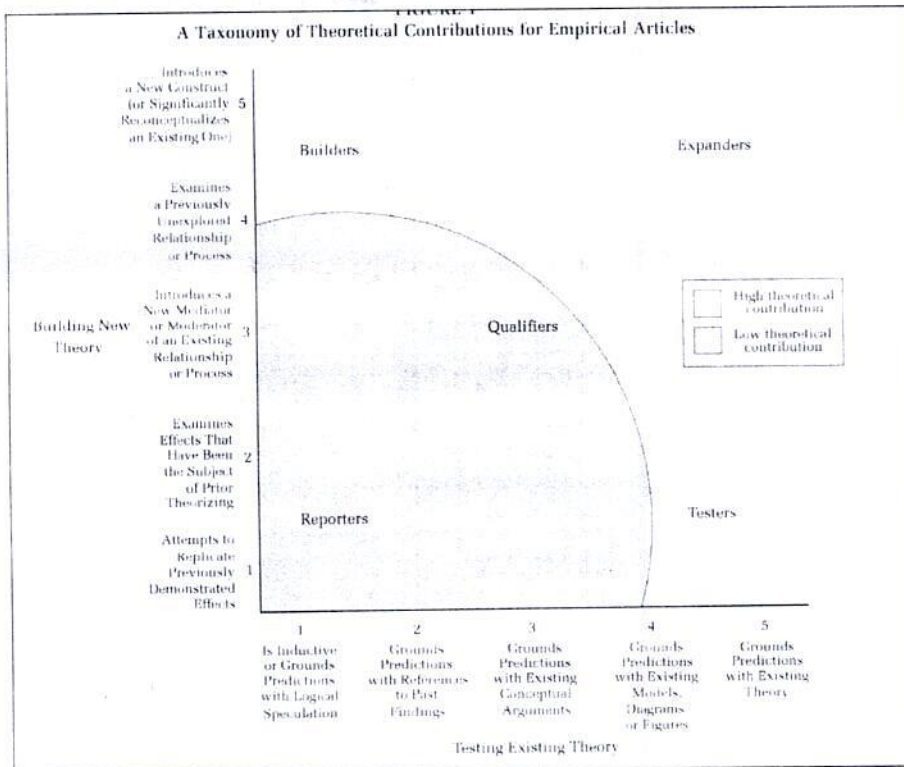

## Discussion & Conclusion

- Research work must have a central proposition and follow a clear and logical plot line from introduction to conclusion.
- Each of the sections sets the stage for the following section, and collectively as a whole, they contribute to form a cohesive piece of research.
- Research work must be technically proficient and free from conceptual, methodological, and analytical flaws
- Presented in a compelling manner that tells an integrated story beginning with a key thesis and relevant literature review and concluding with the ability to present the results in a manner that answers the research question and seeks real insights
- The ability to seek insights from data becomes the critical factor that separates academic writing from research reports.
- Have a target journal in mind when you begin to plan a research project, rather than choosing it after you write the paper
- – What is acceptable for one journal may not be acceptable for another

# Expectations of Top Tier Quality Journals

Trends in theory building and theory testing: a Five-decade study of the academy of Management journal (2007)

# Learnings from Webinar by Dr. Rameshwar Dubey

**Dr. Rameshwar Dubey**  
DBA, PhD, PDF, FIPE

**Senior Associate Editor**, International Journal of Physical Distribution and Logistics Management (Emerald)  
**Associate Editor**, International Journal of Information Management (Elsevier)  
**Associate Editor**, Journal of Humanitarian Logistics and Supply Chain Management (Emerald)

**Awards:**

- Shortlisted among top 1% most cited scholars
- Outstanding Reviewer Award
- Received title for lifetime commitment to advancing scientific knowledge

# Learnings from Webinar by Dr. Rameshwar Dubey

The image shows a screenshot of a webinar presentation. At the top, there is a menu bar with options like 'File', 'Edit', 'View', 'Tools', 'Help', and 'About'. Below the menu bar, there is a slide with the following content:

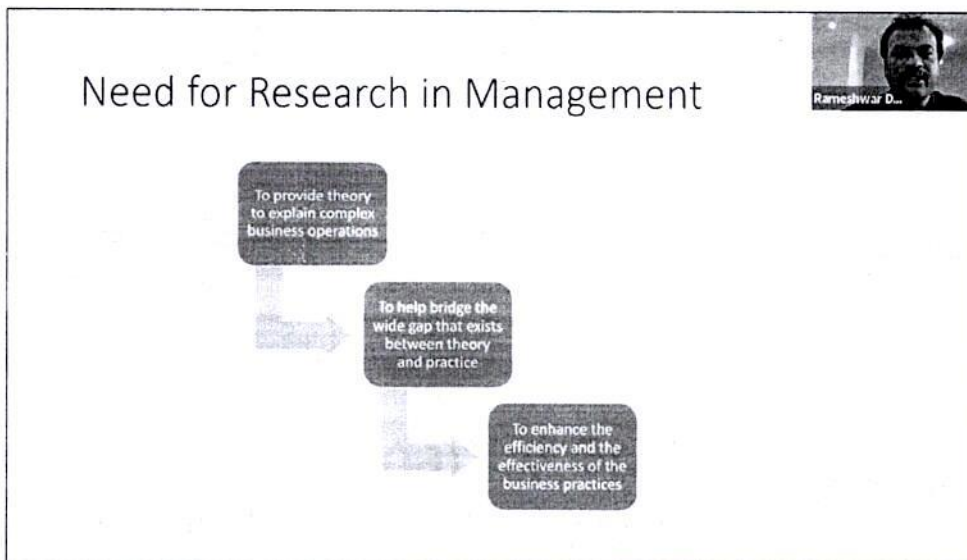

5 myths of publishing in top tier Journals:

- I have collected rich data or using advanced scientific tools;
- I am attached to a big school;
- I am working with editors of top Journals;
- I have collected data from developed economies;
- I am from Indian sub-continent;

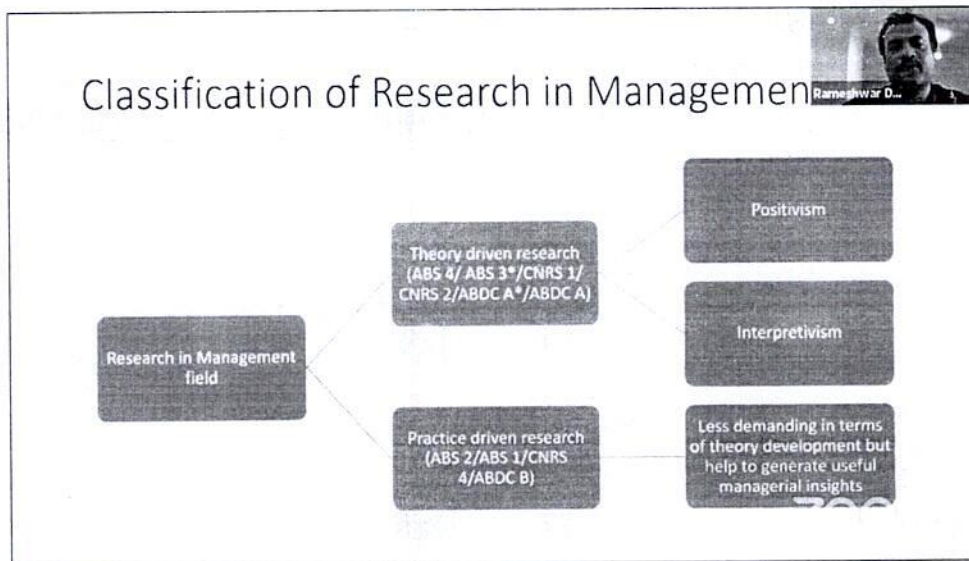

On the right side of the slide, there is a small video feed of Dr. Rameshwar Dubey. The slide also contains some faint text and a small diagram on the left side.

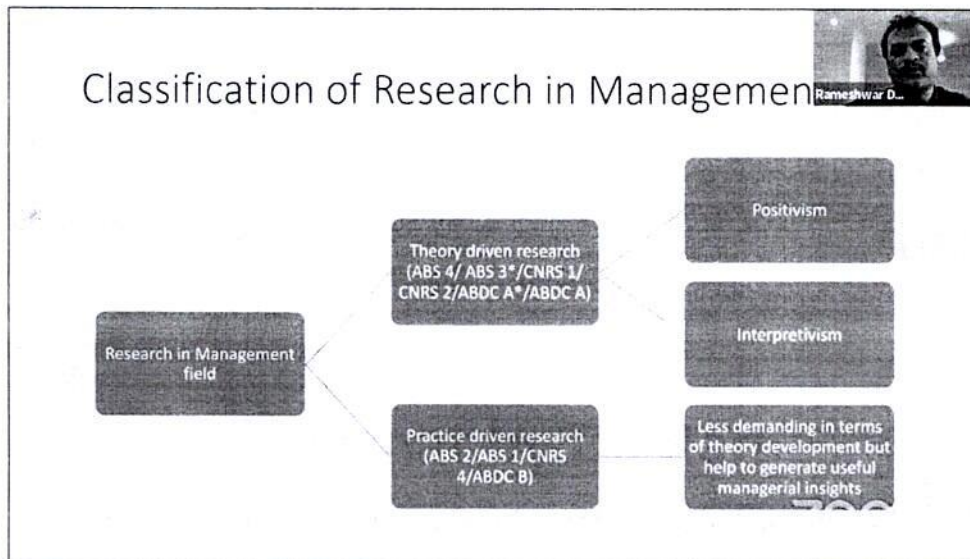

# Learnings from Webinar by Dr. Rameshwar Dubey

# Learnings from Webinar by Dr. Rameshwar Dubey

Classification scheme of a research manuscript:

# Learnings from Webinar by Dr. Rameshwar Dubey

A-agile; A-adaptable; A-align

1. As a PhD scholar/ PhD thesis supervisor/ Independent scholar/Post Doctoral Scholar, need to be agile: speed, sensing capability and flexibility.
2. As a PhD scholar/ PhD thesis supervisor/ Independent scholar/Post Doctoral Scholar), need to be adaptable: change in manuscript structure, research methods, theory driven research, post-hoc analysis and other dynamic issues that decide the fate of the manuscript.
3. Align manuscript design based on journal guidelines. In fact language, format and organisation of the draft should commensurate authors guidelines.

**Capital budgeting decision-making practices: evidence from Pakistan**

Afeera Mubashar and Yasir Bin Tariq  
Journal of Advances in Management Research  
(Scopus Indexed Emerald publication) Vol. 16  
(2019)

**PRESENTER** → Mrs. Dr. Smita Jape

**DATE OF presentation** → Saturday 20<sup>th</sup> September 2020

1

**GAP identified :-**

Study is different from previous studies

1. conducted in **emerging economies**.
2. investigated the **theory practice gap** by documenting the preferred Capital budgeting tools
3. **detailed responses** regarding cost of capital, methods for calculating cost of capital, the use of real options and how risk is analysed, based on many independent variables including CFO's responses conditional on **firms and executive's characteristics**, (independent variables) to find the relationship of firm size, leverage dividend policy, executives' demographics, etc., with the selection of Capital budgeting techniques, discount rate and risk assessment methods.

Comparisons of developed and developing countries ( study of 33 countries) **33 studies from developed and developing economies**,

4

The main areas of concern in financial management are sources of finance with focus on:

(Freeman and Hobbes, 1991).

- Mix of finance - capital structure
- Cost of finance - cost of capital
- Effective Utilization of funds i.e Capital Investment decisions
- Proportion of debt and equity - leverage and
- Dividend policy- Deployment of profits after taxes

Hence, under this scenario, the present study tries to address Pakistani firms with respect to,

- **methods of assessment of capital investment decisions** and its implications in decision making of companies in selected Pakistani firms.
- various **characteristics of business** such as size, CFOs qualification and other characteristics based on number of employees, exports.

2

**Literature review**

- (Klammer et al., 1991).
- **(Investing in efficient Investment projects is crucial because resources are limited and firms must grow their value.**
- (Ryan and Ryan, 2002; Arnold and Hatzopoulos, 2000).
- **Profitable long-term investments are vital for the sustainability and growth of a firm. The survival and vitality of a firm depend upon its ability to regenerate returns from long-term assets/investments through the proper allotment of capital**
- (Fabozzi and Peterson, 2004). **To increase the wealth of its shareholders, a firm needs to continuously identify, analyze and choose long-term investment projects that could help achieving these goals, i.e., increase in wealth, survival and growth.**
- **This process of selecting, analyzing and investing capital in long-term assets/investments which provide returns for more than one year is known as capital budgeting**

5

**Purpose –**

- to examine the current trends of capital budgeting practices ( **techniques, discount rate estimations and risk assessment methods**) among Pakistani listed firms and
- analyse the responses conditional on **firms demographics and executive characteristics**
- Large/small size firms ,Public sector/pvt sector ,Manufacturing/non manufacturing firms with foreign sales, number of employees, payment of dividends ,cost of capital, CFOs and CEOs age, with longer tenure ,CFOs with professional degree

3

**Literature review**

(Gitman and Vandenberg, 2000 -Estimating the cost of capital is also a vital component of capital investment decisions.

It is recommended to **calculate the cost of every source of capital based** on their relative weights in the capital structure (Brigham and Ehrhardt, 2002).

Three main sources of financing are: **issuing debts, preferred stocks and common stocks.**

Majority of the firms take **faulty investment decisions by considering only the cost of a single source of funding, e.g., cost of equity or cost of debt.** For calculating the discount rate, weighted average cost of capital (WACC) is the recommended approach as compared to "cost of equity" and "cost of debt."

6

## Literature review

- comprehensive studies by Graham and Harvey (2001) in USA - capital budgeting, cost of capital and debt equity structure.
- concluded that large firms are inclined toward NPV and CAPM contrary to small firms who relied on PBP
- empirical literature on capital budgeting can be broadly divided into **three set of studies.**
- 1) developed economies. These include studies conducted in the **USA** (Gitman and Forrester, 1977; Schall et al., 1978; Block, 1997; Farragher et al., 1999; Graham and Harvey, 2001; Ryan and Ryan, 2002), the **UK** (Pike, 1989; Pike and Sharp, 1989; Pike, 1996; Arnold and Hatzopoulos, 2000; Alkaraan and Northcott, 2006), **Australia** (Truong et al., 2008), **Canada** (Jog and Srivastava, 1995; Bennouna et al., 2010), **Spain** (Andrés et al., 2014) and **Hong Kong** (Lam et al., 2007; Chen, 2008).

7

## Literature review

**Arnold 2009 paper** concluded that Canadian firms are frequent users of DCF, inclined toward sophisticated methods like real budgeting options, Monte Carlo simulation, decision trees and game theory

**Hatzopoulos (2010)** survey of 296 UK firms revealed that the **theory-practice gap is minimum as UK firms are preferring DCF-based CBTs.**

10

## Literature review

- 2) The second set contains studies from **developing/emerging economies.**
- For example, studies conducted in **Malaysia** (Kwong, 1986), **India** (Babu and Sharma, 1996; Singh et al., 2012; Batra and Verma, 2017), **Argentina** (Pereiro, 2006), **South Africa** (Correia and Cramer, 2008), **Jordan** (Khamees et al., 2010), **Poland** (Wnuk-Pel, 2014), **Sri Lanka** (Nurullah and Kengatharan, 2015), **Brazil** (Souza and Lunkes, 2016), Kuwait (Alkulaib et al., 2016) and Morocco (Baker et al., 2017).

8

## Literature review

- Andrés et al. (2014)** at large firms are preferring sophisticated CBTs and CAPM whereas small firms rely on simple PBP. carried out a survey of CFOs of 140 large non-financial Spanish companies.
- They reported that Spanish firms use PBP (75 percent) more than IRR and NPV. The prevalence of PBP method is higher in Spanish firms as compared
- Batra and Verma (2017)** For risk measurement, sensitivity analysis was the preferred approach. Similar findings were reported by Batra and Verma (2017). Additionally they revealed that company size, CFO's age and CFO's education are significantly associated with the use of sophisticated CBT.

11

## Literature review

- third set of studies is of **multi-country studies** where either groups of countries are studied or **comparison is made between countries from developed and developing economies.**
- These include studies such as that of Brounen et al. (2004) (investigated four European countries, i.e., the UK, France, Germany and the Netherlands), Rossi (2014) (three European countries i.e. Italy, Spain and France), Andor et al. (2015) (ten Central and Eastern European (CEE) countries), Brunzell et al. (2013) (five Nordic countries) and Hermes et al. (2007) (comparative study of China and the Netherlands).
- A tabular summary of 33 studies from developed and developing economies, summarizing the respective survey findings of individual studies, is given at the end of this section.

9

## 1 Research design

- This is an exploratory study using primary data and secondary data (questionnaire)
- The aim was to collect responses from Pakistani listed firms on three main areas of investment decisions.
- i.e., 1) CBT, 2) discount rate (cost of capital) and 3) risk techniques used in capital budgeting decisions.
- Further Analysis**
- 4) demographic information of CEO, CFO and firms' characteristics.
- A modified version of the questionnaire of Graham and Harvey
- Likert standard 5 - category scale of Graham and Harvey (2001)
- Primary data --- top 200 non-financial listed firms based on market capitalization  
Secondary data is collected from financial statistics of the respective companies and other secondary sources which include data from "investor's guide to corporate data".

12

## Questionnaire

- The first part of the questionnaire measures the **preference of firms** regarding CBT.
- The second part- **cost of capital**, method for calculating the cost of capital, **timing** related to the calculation of cost of capital and the most frequent methods used to estimate "cost of equity capital.
- "The third part - concerned with the methods used to analyse **risk in capital budgeting** decision-making process.
- fourth part of questionnaire - **demographic information of CEO, CFO and firms' characteristics.**

13

## Hypothesis

**48 individual hypotheses** that can be grouped into 3 main hypotheses.

Each main hypothesis has **16 sub-hypotheses** for each individual firm and executive's characteristics:

3main Hypotheses

**H1. There is a significant difference of capital budgeting responses across firm's demographic and executive characteristics.**

**H2. There is a significant difference of cost of capital responses across firm's demographic and executive characteristics.**

16

## Data Collection

- Pakistani firms chose KSE-100 indexed firms, which can be described as top 100 firms in terms of market capitalization and a representative of Pakistani stock market.
- KSE-100, approximately 20 are financial firms so questionnaire to top 200 non-financial firms (in terms of market capitalization) that also includes KSE-100 non-financial firms.
- questionnaire was sent to top 200 listed non-financial firms
- five months to gather the responses.
- Out of 200 firms, 70 firms responded.
- The response rate of this study is 35 percent

14

## Analysis of the responses of firms using capital budgeting techniques

	Sample Size (N)	Number of Firms (%)	Number of Executives (%)
Net present value (NPV)	104 (148)	29.4% (42)	61.4% (43)
Internal rate of return (IRR)	44 (63)	12.3% (17)	27.1% (19)
Payback period (PI)	4 (6)	1.1% (2)	8.6% (6)
Hurdle rate	21 (30)	5.8% (8)	4.3% (3)

The hurdle rate, also called the minimum acceptable rate of return

17

## Methods of analysis

- The collected data were analyzed and presented using frequency tables and inferential statistics.
- This study used non-parametric Mann-Whitney U test to test the significant difference of investment decision mean responses conditional on firms' demographics and executive characteristics

15

## 1. Results and analysis of use of capital budgeting techniques

- Respondents were asked about CBT (methods)
- NPV, IRR and PI are the most frequently used methods
- NPV is the most popular approach (61.4 percent of respondent firms always use NPV)
- IRR is always used by 27 percent firm, but interestingly 100 percent firms use IRR with NPV as a second choice.
- The finance theory suggests that NPV is a technically superior method than IRR.
- confirmed that theory-practice gap is low among Pakistani listed firms as their first preference is NPV.

18

### Results and analysis

- IRR cannot be used for long-term projects in which there are varying rates of "cost of capital" and mixed cash flows. Therefore, not advisable to use IRR over NPV.
- frequently use PBP in addition to DCF capital budgeting methods.
- firms are emphasizing on the liquidity.
- emerging economies are suffering from financial constraints; therefore, firms in financially constrained economies use PBP method as a complementary tool to assess the immediate liquidity of potential investment projects

### Responses

22

### Analysis of the responses of firms use of cost of capital and weights for WACC

20

### Analysis of the capital budgeting practices conditional on firm's demographic and executive characteristics

23

### 2.Results and analysis of the responses of firms use of cost of capital and weights for WACC

- The minimum acceptable rate of return.
- asked about the methods used to determine the minimum acceptable rate of return (discount rate or cost of capital).
- Majority of the respondents (80 percent) are using WACC to evaluate their potential investment projects, while the "cost of debt" is the least popular method (4.3 percent).

21

### Man-whitney U test for significance of use of capital budgeting practices conditional on firm's demographic and executive characteristics

24

**1.Capital Budgeting Technics :Analysis based on demographic and executive characteristics**

- Large firms significantly (at 5% significance level) use IRR, hurdle rate, EMA(Earning Multiple Average ) and APV(Adjusted Present Value ).
- DCF methods could be a costly affair. The use of DCF methods by large firms can be attributed to the fact that large firms are dealing with big projects and have less or no budget/financial constraints.
- In contrast small firms significantly use PBP than large firms
- Small firms have budget constraints; therefore, these firms are more likely to use less costly CBT. Small firms are also in constant financial pressure Therefore, these firms might feel a need to acquire initial investment quickly.

25

**1.Capital Budgeting Technics :Analysis based on demographic and executive characteristics**

- Firms that have rated debt significantly use NPV, hurdle rate, EMA and APV.
- Firms with non-rated debt use PBP.
- Rated debt signals the creditworthiness of firms making a certain financial environment. It encourages firms to engage their funds for a longer time in projects by preferring sophisticated methods of capital budgeting.
- Firms with non-rated debt may face the risk of insolvency/bankruptcy.
- these firms might need to acquire initial investment quickly, thus it could be the reason for preferring the PBP method.

28

**1.Capital Budgeting Technics :Analysis based on demographic and executive characteristics**

- Firms with foreign sales as a percentage of total sales significantly use APV more than firms without exports.

Foreign sales affect the financial risk, currency risk and political risk of the firms. Therefore, firms use APV because in global market uncertainties, revenues and financing patterns are expected to change significantly and APV accounts for all "financing side effects."

- For the rest of CBTs, there is no significant difference between firms with foreign sales and no-foreign sales.

26

**Analysis of the use of method for calculation of cost of capital conditional on firm's demographic and executive characteristics**

29

**1.Capital Budgeting Technics :Analysis based on demographic and executive characteristics**

- Firms pay dividend significantly use EMA(earning multiple approach ) and hurdle rate in addition to DCF methods like NPV and APV.
- It means that companies that pay dividend are already liquid and there is no capital rationing. Therefore, these firms use sophisticated CBT.
- Growth firms significantly make more use of NPV, IRR and hurdle rate.
- These firms have large potential projects that minimize the cost of using DCF methods of capital budgeting than non-growing firms.

27

**2.Analysis of the cost of equity capital estimation method responses conditional on firm's demographic and executive characteristics**

- Respondents were asked about "how often firms review their cost of capital,"
- more than half of the firms (57.1 percent) review their cost of capital "whenever there is a significant change in the business environment"
- whereas 24 percent of the respondents review the cost of capital whenever a new project is to be evaluated.
- While "semi annually" and "quarterly" are the least popular time to review the cost of capital estimates.

30

### 1. CAPITAL BUDGETING DECISIONS:

- Pakistani listed firms preferring DCF methods of capital budgeting.
- Out of these methods, NPV is the most popular method as compared to IRR, but IRR is always used along with NPV.
- However, in contrast Pakistani firms are not preferring MIRR, which is theoretically a better alternative to IRR.

31

### Conclusion :

- real options is the valuable tool to assess a project's implicit risk. Without considering real options while evaluating projects, a firm could reject a potentially viable project and vice versa
- the likelihood of using specific techniques/methods (for capital budgeting, cost of capital estimation and risk assessment) are linked to the firm's demographics and executive characteristics
  - use of NPV /AMR CBTs by larger firms and PBP by smaller firms
  - CFOs with less time in the current job are significantly more likely to use PBP.
  - CFOs holding non-business degrees are more likely to use DPBP and PI.
  - NPV and IRR are not preferred by non-business degree holder CFOs.
  - dividend-paying Pakistani firms cited "regulatory authority decisions" as motivation or preferable method for estimating the cost of equity capital
